## A. RISK FACTORS

### Standard Risk Factors:

- Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Fund will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the schemes.
- The names of the schemes do not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of 1 Lac made by it towards setting up the Fund.
- The schemes under this Scheme Information Document are not guaranteed or assured return schemes.

A Unitholder in JM Financial Mutual Fund's scheme - JM Dynamic Bond Fund should be aware of the risks generally associated with investments in the fixed income and money markets. Below are some of the common risks associated with investments in fixed income and money market securities. These risks include:

### Other Risk Factors:

#### a) INTEREST RATE RISK

As with all debt securities, changes in interest rates will affect the NAVs of the Scheme as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long term securities generally fluctuate more in response to interest rate changes than of shorter-term securities. Interest rate movements in the Indian debt markets can be volatile leading to the possibility of large price movements up or down in debt and money market securities and thereby to possibly large movements in the NAV.

#### b) LIQUIDITY OR MARKETABILITY RISK

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio.

#### c) CREDIT RISK

Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk, debentures are sold at a yield spread above those offered on treasury securities which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.

#### d) REDEMPTION RISK

As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or a restructuring of the Scheme.

#### e) SECURITIES LENDING

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

#### f) REINVESTMENT RISK

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested will fall.

#### g) DERIVATIVE RISKS

In the derivative markets there are risk factors and issues concerning the use of derivatives that investors should understand. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to manage the risks as a result of the failure of the counterparty to comply with the terms of the derivative contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives, credit risk where the danger is that of a counterparty failing to honour its commitment, liquidity risk where the danger is that the derivatives cannot be sold at prices that reflect the underlying assets, rates and indices and price risk where the market price may move in adverse fashion.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments and are set out in more detail under the head **POLICY AND SPECIAL CONSIDERATION ON INVESTMENT IN DERIVATIVES AND HEDGING PRODUCTS** given below

### POLICY AND SPECIAL CONSIDERATION ON INVESTMENT IN DERIVATIVES AND HEDGING PRODUCTS

The Scheme may take derivatives position in the fixed income and equity markets based on the opportunities available subject to the guidelines provided by SEBI from time to time and in line with the overall investment objective of the Scheme.

#### Fixed Income Derivatives

Generally, interest rate swaps involve exchange of a fixed rate to a floating rate of interest or vice versa. These are known as Plain Vanilla Swaps. The RBI has currently allowed only these swaps in the Indian market. An interest rate swap agreement (as per guidelines issued by RBI on 7th July 1999 and 1st November 1999) from fixed rate to floating rate will be an effective hedge for portfolio in a rising interest rate environment.

#### Interest Rate Swaps (IRS)

An IRS is an agreement between two parties to exchange stated interest obligations for an agreed period in respect of a notional principal amount. The most common form is a fixed to floating rate swap where one party receives a fixed (pre-determined) rate of interest while other receives a floating (variable) rate of interest.

#### Forward Rate Agreement (FRA)

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

#### Basic structure of a Swap

Assume that the Scheme has a Rs. 20 crore floating rate investment linked to MIBOR (Mumbai Inter Bank Offered Rate). Hence, the Scheme is currently running an interest rate risk and stands to lose if the interest rate moves down. To hedge this interest rate risk, the Scheme can enter into a 6 month MIBOR swap. Through this swap, the Scheme will receive a fixed predetermined rate (assume 12%) and pays the "benchmark rate" (MIBOR), which is fixed by the National Stock Exchange of India limited (NSE) or any other agency such as Reuters. This swap would effectively lock-in the rate of 12% for the next 6 months, eliminating the daily interest rate risk. This usually routed through an intermediary who runs a book and matches deals between various counterparties.

#### The steps will be as follows :

- Assuming the swap is for Rs. 20 crore June 1, 2011 to December 1, 2011. The Scheme is a fixed rate receiver at 12% and the counterparty

is a floating rate receiver at the overnight rate on a compounded basis (say NSE MIBOR).

- On June 1, 2011 the Scheme and the counterparty will exchange only a contract of having entered this swap. This documentation would be as per International Swap Dealers Association (ISDA). On a daily basis, the benchmark rate fixed by NSE will be tracked by them.
- On December 1, 2011 they will calculate the following –
- The Scheme is entitled to receive interest on Rs. 20 crore at 12% for 184 days i.e. Rs. 1.21 crore, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.
- The counterparty is entitled to receive daily compounded call rate for 184 days & pay 12% fixed.
- On December 1, 2011, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 1.21 crore, the Scheme will pay the difference to the counterparty. If the daily compounded benchmark rate is lower, then the counterparty will pay the Scheme the difference.
- Effectively the Scheme earns interest at the rate of 12% p.a. for six months without lending money for 6 months fixed, while the counterparty pays interest @ 12% p.a. for 6 months on Rs. 20 crore, without borrowing for 6 months fixed.

The above example illustrates the benefits and risks of using derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk, etc. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

#### Valuation of Derivative Products:

- a) The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the SEBI Regulations, as amended from time to time.
- b) The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the SEBI Regulations as amended from time to time.

#### Risk factors

- **Credit Risk:** The credit risk is the risk that the counter party will default on obligations and is generally negligible, as there is no exchange of principal amounts in a derivative transaction.
- **Market Risk:** Derivatives carry the risk of adverse changes in the market price.
- **Illiquidity Risk:** The risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.
- The fund pays the daily compounded rate. In practice however there can be a difference in the actual rate at which money is lent in the call market and the benchmark, which appears and is used.

#### h) RISK FACTORS ASSOCIATED WITH PROCESSING OF TRANSACTION THROUGH STOCK EXCHANGE MECHANISM:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE, on any Business Day will depend upon the modalities of processing viz. collection of application form, KYC documentation, order processing/ settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

#### i) RISKS ASSOCIATED WITH SEGREGATED PORTFOLIO:

- Unit holders holding units of segregated portfolio may not be able to liquidate their holdings till recovery of money from the issuer.
- Security in the segregated portfolio may not realize any value.
- Listing of any units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

#### j) BACKSTOP FACILITY IN FORM OF INVESTMENT IN CORPORATE DEBT MARKET DEVELOPMENT FUND (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to

begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

Investors are requested to read details disclosure on investment of the schemes in the CDMDF as listed in sub-section "C. How will the Scheme allocate its assets? And sub-section D. Where will the Scheme Invest" in Section "Section II- Information about the scheme" of SID.

#### k) INVESTMENT EXPOSURE OF THE FUND WITH REFERENCE TO SECURITISED DEBT AND RISK FACTORS SPECIFIC TO INVESTMENTS IN SECURITISED PAPERS

The Fund may invest only in those securitisation issuances which have a rating of AA and above indicating the high level of safety from credit risk point of view at the time of making an investment. The Fund will not invest in foreign securitised debt.

The Fund may invest in various type of securitisation issuances, including but not limited to Asset Backed Securitisation, Mortgage Backed Securitisation, Personal Loan Backed Securitisation, Collateralized Loan Obligation / Collateralized Bond Obligation and so on.

The Fund will conduct an independent due diligence on the cash margins, collateralisation, guarantees and other credit enhancements and the portfolio characteristic of the securitisation to ensure that the issuance fits in to the overall objective of the investment in high investment grade offerings irrespective of underlying asset class.

Types of securitised debt vary and carry different levels and types of risks. Credit risk on securitised bonds depends upon the originator and varies depending on whether they are issued with recourse to originator or otherwise. Even within securitised debt, AAA rated securitised debt offers lesser risk of default than AA rated securitised debt. A structure with Recourse will have a lower credit risk than a structure without recourse.

#### Risk analysis on underlying asset classes in securitisation

Generally the following asset classes for securitisation are available in India :

- (a) Commercial Vehicles
- (b) Auto and Two wheeler pools
- (c) Mortgage pools (residential housing loans)
- (d) Personal Loan, credit card and other retail loans
- (e) Corporate loans/receivables

Underlying assets in securitised debt may assume different forms and the general types of receivables include auto finance, credit cards, home loans or any such receipts. Credit risks relating to these types of receivables depend upon various factors including macro economic factors of these industries and economies. Specific factors like nature and adequacy of property mortgaged against these borrowings, nature of loan agreement / mortgage deed in case of home loan, adequacy of documentation in case of auto finance and home loans, capacity of borrower to meet its obligation on borrowings in case of credit cards and intentions of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.

Holders of the securitised assets may have low credit risk with diversified retail base on underlying assets especially when securitised assets are created by high credit rated tranches. Risk profiles of Planned Amortisation Class tranches (PAC), Principal Only Class Tranches (PO) and Interest Only class tranches (IO) will differ depending upon the interest rate movement and speed of prepayment.

In terms of specific risks attached to securitisation, each asset class would have different underlying risks, however, residential mortgages are supposed to be having lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables, etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other AAA rated asset classes. The rating agencies have an elaborate system of stipulating margins, over collateralisation and guarantees to bring risk limits in line with the other AA rated securities.

The risks associated with the underlying assets can be described as under :

Credit card receivables are unsecured. Automobile / vehicle loan receivables are usually secured by the underlying automobile / vehicle and sometimes by a guarantor. Mortgages are secured by the underlying property. Personal loans are usually unsecured.

Corporate loans could be unsecured or secured by a charge on fixed assets / receivables of the company or a letter of comfort from the parent company or a guarantee from a bank / financial institution. As a rule of thumb, underlying assets which are secured by a physical asset / guarantor are perceived to be less risky than those which are unsecured. By virtue of this, the risk and therefore the yield in descending order of magnitude would be credit card receivables, personal loans, vehicle / automobile loans, mortgages and corporate loans assuming the same rating.

**Some of the factors, which are typically analyzed for any pool are as follows :**

**Size of the loan :** generally indicates the kind of assets financed with loans. Also indicates whether there is excessive reliance on very small ticket size, which may result in difficult and costly recoveries. To illustrate, the ticket size of housing loans is generally higher than that of personal loans. Hence in the construction of a housing loan asset pool for say Rs.10,000,000/- it may be easier to construct a pool with just 10 housing loans of Rs.1,000,000 each rather than to construct a pool of personal loans as the ticket size of personal loans may rarely exceed Rs.500,000/- per individual. Also to take this illustration further, if one were to construct a pool of Rs.10,000,000/- consisting of personal loans of Rs.100,000/- each, the larger number of contracts (100 as against one of 10 housing loans of Rs.10 lakh each) automatically diversifies the risk profile of the pool as compared to a housing loan based asset pool.

**Average original maturity of the pool :** indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. To illustrate, in a car pool consisting of 60-month contracts, the original maturity and the residual maturity of the pool viz. number of remaining installments to be paid gives a better idea of the risk of default of the pool itself. If in a pool of 100 car loans having original maturity of 60 months, if more than 70% of the contracts have paid more than 50% of the installments and if no default has been observed in such contracts, this is a far superior portfolio than a similar car loan pool where 80% of the contracts have not even crossed 5 installments.

**Loan to Value ("LTV") Ratio :** Indicates how much % value of the asset is financed by borrower's own equity. The lower the LTV ratio, the better it is. This ratio stems from the principle that where the borrower's own contribution of the asset cost is high, the chances of default are lower. To illustrate for a vehicle costing Rs. 50 lakhs, if the borrower has himself contributed Rs. 40 lakhs and has taken only Rs.10 lakhs as a loan, he is going to have lesser propensity to default as he would lose an asset worth Rs. 50 lakhs if he defaults in repaying an installment. This is as against a borrower who may meet only Rs. 5 lakhs out of his own equity for a vehicle costing Rs. 50 lakhs. Between the two scenarios given above, the latter would have higher risk of default than the former.

**Average seasoning of the pool :** Indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a personal loan, if a pool of assets consists of those who have already repaid 80% of the installments without default, this certainly is a superior asset pool than the one where only 10% of the installments have been paid. In the former case, the portfolio has already demonstrated that the repayment discipline is far higher.

**Default rate distribution :** Indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is very obvious - as against 0-30 DPD, the 60-90 DPD is certainly a higher risk category.

Unlike in plain vanilla instruments, in securitisation transactions, it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating. This is possible through a mechanism called "Credit enhancement" and is fulfilled by filtering the underlying asset classes and applying selection criteria, which further diminishes the risk inherent for a particular asset class. The purpose of credit enhancement is to ensure timely payment to the investors, if the actual collections from the pool of receivables for a given period are short of the contractual payouts on securitisation. Securitisation is normally a non-recourse instrument and therefore, the repayment on securitisation would have to come from the underlying assets and the credit enhancement. Therefore, the rating criteria centrally focuses on the quality of the underlying assets.

World over, the quality of credit ratings is measured by default rates and stability. An analysis of rating transition and default rates, witnessed in both international and domestic arena, clearly reveals that structured finance ratings have been characterized by far lower default and transition

rates than that of plain vanilla debt ratings. Further, internationally, in case of structured finance ratings, not only are the default rates low but post default recovery is also high.

In the Indian scenario, also, more than 95% of issuances have been AAA rated issuances indicating the strength of the underlying assets as well as adequacy of credit enhancement.

#### **Interest Rate Risk**

The change in market interest rates – prepayments may not change the absolute amount of receivables for the investors, but may have an impact on the re-investment of the periodic cash flows that the investor receives in the securitised paper.

#### **Limited liquidity & price risk**

Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

#### **Limited recourse, delinquency and credit risk**

Securitised transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The credit enhancement stipulated represents a limited loss cover to the Investors. These certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the Seller or the originator, or the parent or any associate of the seller, issuer and originator. No financial recourse is available to the certificate holders against the investors' representative. Delinquencies and credit losses may cause depletion of the amount available under the credit enhancement and thereby the investor payouts may get affected if the amount available in the credit enhancement facility is not enough to cover the shortfall. On persistent default of an obligor to repay his obligation, the servicer may repossess and sell the underlying asset. However many factors may affect, delay or prevent the repossession of such asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such asset may be sold may be lower than the amount due from that obligor.

#### **Risks due to possible prepayments: Weighted Tenor / Yield**

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances :

- Obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or
- Receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that receivable; or
- The servicer recognizing a contract as a defaulted contract and hence repossessing the underlying asset and selling the same; or
- In the event of prepayments, investors may be exposed to changes in tenor and yield.

#### **Bankruptcy of the originator or seller**

If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to Trust was not a sale then an investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a "True Sale". Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

#### **Bankruptcy of the investor's agent**

If an investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of investor's agent to the assets/receivables is not in its capacity as agent/ Trustee but in its personal capacity, then an investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by investor's agent is held as agent and in Trust for the investors and shall not form part of the personal assets of investor's agent. Legal opinion is normally obtained to the effect that the investor's agent's recourse to assets/receivables is restricted in its capacity as agent and Trustee and not in its personal capacity.

#### **Credit Rating of the Transaction / Certificate**

The credit rating is not a recommendation to purchase, hold or sell the

certificate in as much as the ratings do not comment on the market price of the certificate or its suitability to a particular investor.

There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

#### **Risk of Co-mingling**

The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, the investors may be exposed to a potential loss.

#### **Risks due to possible prepayments and Charge Offs**

In the event of prepayments, investors may be exposed to changes in tenor and yield. Also, any Charge Offs would result in the reduction in the tenor of the Pass Through Certificates (PTCs).

#### **Bankruptcy of the Swap Bank**

If the Swap Bank, becomes subject to bankruptcy proceedings then an Investor could experience losses or delays in the payments due under the Interest Rate Swap Agreement.

#### **Techniques Risk:**

The Scheme may use techniques (including derivatives, futures and options, warrants, etc.) and instruments that may be permitted and/or that may become permissible under SEBI/RBI Regulations and/or Regulations and/or statutory modification or re-enactment thereof for efficient portfolio management and to attempt to hedge or reduce the risk of such fluctuation. However, these techniques and instruments, if imperfectly used, have the risk of the scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's/ Scheme's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organized stock exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase/redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

#### **Liquidity and Settlement Risks:**

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors etc. based on certain investment parameters as adopted internally by AMC. While at all times the Trustees and the AMC will endeavor that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme be avoided, the assets invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. The Scheme may have difficulty in disposing of certain securities because the security may be unlisted, due to greater price fluctuations there may be a thin trading market, different settlement periods and transfer procedures for a particular security at any given time. Settlement, if accomplished through physical delivery of stock certificates, is labour and paper intensive and may affect the liquidity. It should be noted that the Fund bears the risk of purchasing fraudulent or tainted papers. The secondary market for money market/debt securities does exist, but is generally not as liquid as the secondary market for other securities. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event, such as the deterioration in the creditworthiness of the issuer, etc. or during restructuring of the Scheme's investment portfolio. Furthermore, from time to time, the AMC, the Custodian, the Registrar, any Associate, any distributor, dealer, any company, corporate body, trust, any scheme/Mutual Fund managed by the AMC or by any other AMC may invest in the Scheme. While at all times the Trustees and the AMC will endeavor that excessive holding of Units in the Scheme among a few unit holders is avoided, however, the amounts invested by these aforesaid persons may acquire a substantial portion of the Scheme's outstanding Units and collectively may constitute a majority unit holder in

the Scheme. Accordingly, redemption of Units held by such persons may have an adverse impact on the value of the redemption and may impact the ability of the unit holders to redeem their respective Units.

#### **Risk Management framework to mitigate liquidity risk is summarised as below:**

For the information of Risk Management framework to mitigate liquidity risk, kindly refer provision setout in the SID.

#### **B. RISK MITIGATION MEASURES FOLLOWED:**

Risk management is an integral part of the investment process. The AMC incorporates adequate safeguards for controlling risks in the portfolio construction process, which would be periodically evaluated. Online monitoring of various exposure limits are done by the Front Office System. The system incorporates all the investment restrictions as per SEBI guidelines and 'soft' warning alerts at appropriate levels for preemptive monitoring. The system also enables identifying & measuring the risk through various risk measurement tools and analyzes the same so as to act in a preventive manner. In addition to minimize the major risks for equity & debt schemes, the following steps are taken

##### **Credit Risk – Risk of investing in unsustainable / weak companies**

- In depth credit evaluation of the money market and debt instruments (other than GSecs) proposed to be invested in.
- Issuer wise and Industry wise exposure limits.
- Independent rating of scheme portfolio by recognized rating agency.
- Defining the minimum rating grades at portfolio level.

##### **Interest Rate Risk –**

- Risk of bond prices falling as a result of rise in interest rates.
- Active duration management.
- Cap on Average Portfolio maturity depending upon the scheme objective and Strategy.
- Portfolio exposure spread over various maturities depending on the mandates of the respective schemes.

##### **Liquidity Risk**

- High impact cost at the time of buying/selling
- Focus on good quality paper having good liquidity in the market at the time of portfolio construction.
- Asset-Liability management

The scheme may also use derivatives and other hedging instruments, as permitted, from time to time, in order to protect the value of the portfolio.

##### **Creation of segregated portfolio:**

In case of a credit event at issuer level and to deal with liquidity risk, the AMC may create a segregated portfolio of debt and money market instruments including unrated or money market instruments of an issuer that does not have outstanding rated debt or money market instruments, under the Scheme in compliance with the para no 4.4 of SEBI Master Circular.

In this regard, the term 'segregated portfolio' shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme(s).

The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio and the term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event i.e. main portfolio and all segregated portfolio(s).

The AMC may create a segregated portfolio in a mutual fund scheme in case of a credit event at Issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- a) Downgrade of a debt or money market instrument to 'below investment grade', or
- b) Subsequent downgrades of the said instruments from 'below investment grade', or
- c) Similar such downgrades of a loan rating, or
- d) Actual default of either the interest or principal amount in case of unrated debt or money market instruments.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as detailed above and implemented at the ISIN level. Creation of segregated portfolio shall be optional and at the discretion of the AMC.

Further, the AMC shall seek approval of the Trustees prior to creation of the segregated portfolio.

For further information, kindly refer Creation of segregated Portfolio provision setout in the SID.

#### **Investment in Corporate Debt Market Development Fund (“CDMDF”)**

#### by certain debt schemes of the Fund:

Investors are requested to note that as per the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996, SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/128 dated July 27, 2023 on framework for CDMDF and SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on investment by mutual fund schemes and Asset Management Companies (AMCs) in units of CDMDF, the captioned scheme of the Mutual Fund and JM Financial Asset Management Limited (the "AMC") shall invest such percentage of net assets in the units of the CDMDF.

For further information, kindly refer the SID.

#### Special Products / facilities available during the NFO and thereafter

##### A. Direct Plan

Pursuant to para-no. 2.5 of SEBI Master Circular, JM Financial Trustee Company Private Limited, (the "Trustee" to the Mutual Fund), has introduced a separate plan for direct investments (i.e. investments not routed through an AMFI Registration Number (ARN) Holder ("Distributor") (hereinafter referred to as "Direct Plan") as under:

Direct Plan is only for investors who purchase/subscribe units in the Scheme directly with the Fund and is not available for investors who route their investments through a Distributor.

**Plans / Options / Sub-options:** All Plans / Options / Sub-Options being offered under the Scheme ("Regular Plan") will also be available for subscription under the Direct Plan. Thus, there shall be 2 Plans available for subscription under the Scheme viz., Regular Plan and Direct Plan. Portfolio of the Scheme under the Regular Plan and Direct Plan will be common.

The provisions pertaining to Minimum Subscription Criteria, Load and Additional Purchases will be applicable at Scheme (Portfolio) Level.

**Scheme characteristics:** Scheme characteristics such as Investment Objective, Asset Allocation Pattern, Investment Strategy, risk factors, facilities offered and terms and conditions including load structure will be the same for the Regular Plan and the Direct Plan, except that:

- No exit load shall be charged for any switch of investments between Regular Plan (whether the investments were made before or after the Effective Date) and Direct Plan within the same Scheme. The applicable exit load, if any, will be charged for redemptions/ switch outs of the Scheme (i.e. at portfolio level) before the completion of the stipulated load/ lock-in period. The stipulated load/ lock-in period will be reckoned from the date of allotment of units for a particular transaction in the Scheme (i.e. at portfolio level) till the date of redemption / switch out from that scheme, irrespective of the number of intra-scheme switches by the investor between the aforementioned two dates (e.g. switches between plans/sub-plans/options/sub-options within the Scheme having the same portfolio)
- The extant provisions of applicability of load on redemptions/ switches from one Scheme to another will continue to be applicable.

Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Plan.

#### Applicable NAV and allotment of units:

The provisions of applicability of NAV and allotment of units will be same for Regular and Direct plan.

**Eligible investors / modes for applying:** All categories of investors (whether existing or new Unitholders), as permitted under the SID of the Scheme, are eligible to subscribe under Direct Plan. Investments under Direct Plan can be made through various modes offered by the Fund for investing directly with the Fund and all other Platform(s) where investors' applications for subscription of units are routed through SEBI registered Investment Advisors.

#### How to apply:

- Investors subscribing under Direct Plan of the Scheme will have to indicate "Direct Plan" against the Scheme name in the application form/ transaction slip e.g. "JM Dynamic Bond Fund (Direct)".  
However, in the event of the Investor having failed to mention the plan clearly, the following Default Plan will be captured for the investment under the scheme.
- Investors may also indicate "Direct" in the ARN column of the application form/ transaction slip. However, in case Distributor/ Sub- broker code is mentioned in the application form, but "Direct Plan" is indicated against the Scheme name or in any other place or in any manner whatsoever in the Application Form/ transaction slip, the Distributor/ Sub-broker code will be ignored and the application will be processed under Direct Plan.
- Further, where application is received for Regular Plan without Distributor code or the word "Direct" is mentioned in the ARN Column, the application will be processed under the Direct Plan.

#### Existing Investments:

- Investors wishing to transfer their accumulated unit balance held under Regular Plan (through lumpsum / systematic investments made with or without Distributor code) to Direct Plan will have to switch /redeem their investments (subject to applicable Exit Load, if any) and apply under Direct Plan.
- Investors who have invested without Distributor code and have opted for Reinvestment of Income Distribution cum Capital Withdrawal facility under Regular Plan may note that the Income Distribution cum Capital Withdrawal will continue to be reinvested in the Regular Plan only.

#### Investments through systematic routes:

- In case of Systematic Investment Plan ("SIP") / Systematic Transfer Plan ("STP") etc. registered prior to the Effective Date without any distributor code under the Regular Plan, installments falling on or after the Effective Date will automatically be processed under the Direct Plan only.
- Investors who had registered for SIP facility prior to the Effective Date with distributor code shall continue under the Regular Plan. However if the investor wishes that their future installments be invested into the Direct Plan, he shall make a written request to the Fund in this behalf. The Fund will take at least 15 Business days to process such requests. Intervening installments will continue in the Regular Plan.

In case of (a) and (b) above, the terms and conditions of the existing registered enrolment such as tenure, amount of the SIP etc. shall continue to apply.

- In case of Systematic Transfer Facilities which were registered with a Distributor Code under the Regular Plan prior to the Effective Date, the future installments under the said Facilities shall continue as under the Regular Plan

In case such investors wish to invest under the Direct Plan through these facilities, they would have to cancel their existing enrolments and register afresh for such facilities.

**Redemption requests:** Where Units under the Scheme are held under both Regular and Direct Plans and the redemption/ Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number).

In the event of the investor not clearly mentioning the name of the Plan (Regular or Direct)/ Option/ Sub-option/or wherever there is an ambiguity in choice of Plan (Regular or Direct)/ Option/ Sub-option opted for in the request for redemption/switch-out of all/specified amount/ units, in the absence of clarificatory letter from the investor on the day of the transaction, the AMC/ Registrar reserves the right to process the redemption/switch out request from the Regular Plan or Direct Plan if such redemption request can be processed in totality. In such case, the redemption will first be effected from the Regular Plan.

E.g. If an investor has investment of Rs. 5 lakh in an Regular Plan and Rs. 10 lakh in the Direct Plan and a redemption request is received from him for redemption of Rs. 2 lakh without indicating which Plan the redemption is to be effected from, the AMC/ Registrar will effect the redemption from the Regular Plan. In the same example, if the redemption request was for Rs. 7 lakh, the redemption would be effected from the Direct Plan.

However, in case it is not possible to effect the redemption from any one of the Plans in totality i.e. either from the Regular or from the Direct Plan, such redemption request will be treated as void ab-initio and rejected.

E.g. If the redemption request in the above example is for Rs. 12 lakh, the AMC / Registrar will summarily reject the redemption request. Where units are held under any one i.e. under Regular or Direct Plan, the redemption will be processed from such Plan.

**Tax consequences:** Switch / redemption may entail tax consequences. Investors should refer to the tax paras set out elsewhere in the document as well as consult their professional tax advisor before initiating such requests.

**Swing pricing framework:**

Pursuant to 4.10.3 SEBI Master Circular introduced swing pricing framework for open ended debt mutual fund schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds).

Swing pricing refers to a process for adjusting a scheme's Net Asset Value (NAV) to effectively pass on transaction costs stemming from significant net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund, excluding ramp-up period or termination.

Swing pricing is an anti-dilution adjustment that seeks to protect investors in a scheme from performance dilution as a result of significant outflows from the scheme, particularly during market dislocation.

The swing pricing framework will be made applicable only for scenarios related to net outflows from the Eligible Schemes.

**Swing pricing due to market dislocation:**

On declaration of 'market dislocation' by SEBI for specified period, the swing pricing framework shall be mandated for the Eligible Schemes fulfilling both the conditions mentioned below:

1. Have 'High' or 'Very High Risk' on the risk-o-meter as per para no 17.4 of SEBI Master Circular (as of the most recent period at the time of declaration of market dislocation); and
2. Classify themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix as per para no 17.5 of SEBI Master Circular.

Investors may note that the following minimum swing factor shall be applicable for the Eligible Schemes and the NAV will be adjusted downward for swing factor:

Minimum swing factor			
Maximum Credit Risk of scheme →	Class A (Credit Risk Value >=12)	Class B (Credit Risk Value >=10)	Class C (Credit Risk Value <10)
Maximum Interest Rate Risk of the scheme ↓			
Class I: (Macaulay Duration# <=1 year)	-	-	1.5%
Class II: (Macaulay Duration# <=3 years)	-	1.25%	1.75%
Class III: Any Macaulay Duration#	1%	1.5%	2%

**# Concept of Macaulay Duration:** The Macaulay duration (named after Frederick Macaulay, an economist who developed the concept in 1938) is a measure of a bond's sensitivity to interest rate changes. Duration tells investors the length of time, in years, that it will take a bond's cash

flows to repay the investor the price he or she has paid for the bond.

Fixed income securities with higher duration have higher interest rate sensitivity i.e. the changes in price of higher duration bonds are higher as compared to lower duration ones. A zero coupon bond is one which does not pay any interest and all payments are received at maturity. For a zero coupon bond, the duration is same as residual maturity

$$\text{Macaulay Duration} = \frac{\sum_{t=1}^n \left( \frac{tC}{(1+y)^t} + \frac{nM}{(1+y)^n} \right)}{P}$$

**Formula:** There is more than one way to calculate duration, but the Macaulay duration is the most common. The formula is:

where: t = period in which the coupon is received, C = periodic (usually semiannual) coupon payment, y = the periodic yield to maturity or required yield, n = number periods, M = maturity value (in `), P = market price of bond

**Notes:** Duration is quoted in "years." If a bond has a semi-annual period, we convert duration to years before quoting it (a duration of 8 semi-annual periods is 4 years). Duration is a measure of how sensitive the price of a fixed-income instrument is to interest-rate changes. When we say, "The duration of the bond is 4 years," we mean: "If the interest rate on the bond goes up by 1%, the bond's price will decline by 4%."

**Investors may further note the following aspects pertaining to swing pricing:**

- a) When swing pricing framework is triggered and swing factor is made applicable, both the incoming and outgoing investors shall get Net Asset Value (NAV) adjusted for swing factor.
- b) Swing pricing shall be made applicable to all unitholders at unique investor level/PAN level with an exemption for redemptions upto ` 2 lacs per day per investor for each Eligible Scheme. Intra-scheme switches in the Eligible Scheme i.e. switches within an Eligible Scheme viz. from Regular Plan to Direct Plan and vice-versa or from Growth option to Income Distribution cum Capital Withdrawal option and vice versa, will be excluded from applicability of swing pricing.

**Illustration:**

Effect on the NAV for incoming and outgoing investors :

**Illustration:**

- 1) Applicability of swing pricing – Market dislocation as announced by SEBI or on AMFI's recommendation.
- 2) Specified period for applicability of swing pricing – As notified by SEBI.
- 3) Transactions covered including inter scheme switches (for applicability of swing factor):
  - a) Subscriptions including switch-ins
  - b) Redemptions including switch-outs
- 4) Unswung NAV – Rs. 10/- This is before applying swing factor.
- 5) Mandatory swing factor - 2%.
- 6) Consider a scheme having NAV of Rs. 10 and swing factor of 2%, the NAV shall be adjusted as below on issue of notification of market dislocation by SEBI:

$$\begin{aligned} \text{Swing NAV} &= \text{unswung NAV} * (1 - \text{swing factor}) \\ &= \text{Rs. } 10 * (1-0.02) \\ &= \text{Rs. } 10 * (0.98) \\ &= \text{Rs. } 9.8. \end{aligned}$$

If there is any exit load applicable as per scheme provisions, the same will be applied on swung NAV.

The swing pricing framework is subject to the operational guidelines issued by SEBI/AMFI from time to time.

The time of transaction done through various online facilities / electronic modes offered by the Online Channel Partners of the AMC, for the purpose of determining the applicability of NAV, would be the time when the request for purchase / sale / switch of units is received in the servers of AMC/RTA.

In case of transactions through Online facilities / electronic modes, there may be a time lag of few days between the amount of subscription being debited to investor's bank account and the subsequent credit into the respective Scheme's bank account. This lag may impact the applicability of NAV for transactions where NAV is to be applied, based on actual realization/receipt of funds by the Scheme. 3. Investors will have to submit duly filled-in and signed Redemption/ Repurchase Request Form (RRF) available with respective DPs. Normally, these RRF may be available on the websites of respective DPs e.g. Banks etc. As the format of RRF may be different with every DP, the investors are advised to use the RRF procured from their own DP to avoid rejections/delays by their own DP. The ISIN of the Scheme/plan/ sub-plan is printed on the Statement of Account issued to investors.
4. The investors are required to submit 3 copies of RRF to their DPs. One copy of the RRF is used by the DP for issuing acknowledgement to investors whereas the second copy of the RRF will be forwarded by the DP to the Head Office of the RTA i.e M/s KFin Technologies Ltd. The third

copy will be retained by the DP for their own records.

5. Based on the receipt of RRF, if found in order, the DP concerned generates Electronic Redemption Request and blocks the units applied for redemption in the NSDL/CDSL system immediately. After this, the investor will not be able to transfer the blocked units to anyone (i.e. cannot transfer to anyone).
6. The Electronic Requests generated up to the stipulated cut off time which is currently 3 pm every day by DPs shall get transmitted from NSDL / CDSL to respective Registrars of Mutual Fund by 4 - 6 pm.
7. All such Electronic Requests transmitted by NSDL / CDSL by 4 – 6 pm everyday are updated in the system at Registrar's end i.e. M/s KFin Technologies Ltd. for further processing.

  - a) Nullifying the units by confirming Electronic Repurchase Request,
  - b) Applying NAV based on Date and Time of raising Electronic request by DP's for Redemption Request,
  - c) Remitting Redemption proceeds to investor's bank account (as recorded in demat account) within 3 business days and
  - d) Dispatching an SOA (Statement of Account/Consolidated Account Statement) to the registered address of investor.
9. After the above process is completed, the Registrar will update the respective Depository (i.e. NSDL/ CDSL) about the processing of redemption to enable their DPs to issue Fortnightly/ Monthly Transaction Statement.

A Unit holder has in case of physical redemption request for redemption either in terms of Amount or in terms of the number of Units. In case, the redemption request indicates both amount in Rupees and number of Units, the lower of the two in value term will be considered. Where a Rupee amount is specified or deemed to be specified for redemption, the number of Units redeemed will be the equivalent to the amount sought redeemed plus the exit load & applicable Govt levies like STT divided by the redemption price (ie additionally subject to the levy of applicable STT and exit load).

In case of difference/ ambiguity in the amount and units mentioned in any request for Redemption/ Switch, the minimum value (of units and amount) on rupee equivalent basis on the Transaction/ applicable NAV date will be considered by the AMC, provided the investor has not furnished any clarification in writing, duly signed on the date of transaction. In the event of investor not having filled in the Amount/ Units in the Transaction Slip, the AMC will redeem/ switch out all the outstanding units in case the Scheme, Plan, Option are clearly mentioned.

In case, the investor has not mentioned the plans/ sub-plans etc. in the redemption request specifically where he is having holdings in various plans/ sub-plans etc. of the particular scheme, AMC will summarily reject such redemption request if the investor has not furnished any clarification in writing, duly signed on the date of transaction itself, during normal office hours.

Otherwise, such incompletely filled requests would be summarily rejected without processing.

Investors are requested to note that in case of redemption/switch request, if the number of units or the amount to be redeemed/switched out to any other Scheme of JM Financial Mutual Fund, exceeds the number of outstanding units or value of outstanding units, respectively, then JM Financial Asset Management Limited (the "AMC") shall, at its discretion, redeem/switch out all the outstanding units, if no clarificatory letter is received from the respective investor on the date of the transaction and if the condition of minimum investment amount of switch-in scheme is fulfilled.

The number of Units so redeemed will be subtracted from the Unit holder's account and a monthly industry level Mutual Fund Consolidated Account Statement (CAS) containing the details will normally be dispatched / emailed to the Unitholders latest by 15th of subsequent month by NSDL/CDSL in case of Demat Units or by AMFI's appointed Agencies (currently M/s. KFin Technologies Ltd.) for other cases either through email or physical copy.

#### **FIFO Method of redemption/switch-out**

first, i.e. on first in first out basis. Unit holders may also request for repurchase of their entire holding and close the account by indicating the same at the appropriate place in the Transaction Slip/ Repurchase form.

Pursuant to Association of Mutual Funds in India (AMFI) Best Practice Guidelines Circular No.28/2012-13 dated May 15, 2012, unit holders shall note that application for redemption/switch-out for units, for which funds are not realized via purchase or switch-in in the scheme of the Mutual Fund, shall be liable to be rejected. needs.

The switch will be effected by way of a redemption of Units from the Plan/Option and a reinvestment of the net redemption proceeds in the opted Plan/Option of the other Scheme and accordingly, to be effective, the switch must comply with the redemption rules of the switching-out Scheme and the issue rules of the other switching-in scheme (for e.g. as to the minimum number of Units that may be redeemed or issued, exitload, stamp duty, taxes etc). The price at which the Units will be switched out of the Plan will be based on the Repurchase Price, and the proceeds will be invested in the opted Plan/ Option of the other Scheme at the prevailing sale price for units in that scheme/plan/option. The switch - out from one scheme to another scheme (i.e. requiring change in portfolio) will be effective only after the switch - out scheme has received the funds in the Scheme. Accordingly, the applicability of NAV will be dependant on the SEBI guidelines.

#### KYC PROCESS

Pursuant to para no 16.2.4.4 (b) of SEBI Master Circular, in-order to implement uniform KYC norms and eliminate duplication of KYC across SEBI registered intermediaries in the securities market, KYC registration is centralized through KYC Registration Agencies (KRA) registered with SEBI. Thus each investor has to undergo KYC process only once in the securities market and the details would be shared with other intermediaries.

1. New investors are requested to use the revised common KYC Application Form with specified documents as set out in the form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The revised common KYC Application Forms are also available on our website [www.jmfinancialmf.com](http://www.jmfinancialmf.com).
2. The Mutual Fund shall perform the initial KYC of its new investors and may undertake enhanced KYC measures commensurate with the risk profile of its investors. The Mutual Fund shall upload the details of the investors on the system of the KYC Registration Agency (KRA). KRA shall send a letter to the investor within 10 working days of the receipt of the initial/updated KYC documents from the Mutual Fund, confirming the details thereof.
3. It is mandatory for intermediaries including mutual funds to carry out In-Person Verification (IPV) of its new investors from the Effective Date. The IPV carried out by any SEBI registered intermediary can be relied upon by the Mutual Fund. The AMC or NISM/AMFI certified distributors who are KYD compliant are authorized to undertake the IPV for Mutual Fund investors. Further, in case of any applications received directly (i.e. without being routed through the distributors) from the investors, the Mutual Fund may rely upon the IPV (on the KYC Application Form) performed by scheduled commercial banks.
4. Once the investor has done KYC as per the revised process with a SEBI registered intermediary, the investor need not undergo the same process again with another intermediary including mutual funds. However, the Mutual Fund reserves the right to carry out fresh KYC of the investor.
5. The AMC reserves the right to reject application forms for transactions in units of the Mutual Fund not accompanied by letter/ acknowledgement issued by KRA. The KYC compliance status will be validated with the records of the KRA before allotting units.
6. Existing KYC compliant investors of the Mutual Fund, who have completed the KYC process prior to January 01, 2012, can continue to invest as per the practice prevalent prior to the effective date. However it will not be applicable for investments in securities market.

**Note:** The above change in relation to KYC process shall be applicable in respect of all investment applications ( including MICRO SIP ) by new investors made on or after January 01, 2012.

All investors (Individuals or Non Individuals) who wish to make an investment in a mutual fund scheme through purchase or switch via a Lumpsum amount or via a Systematic Plan (SIP/STP) (including MICRO

SIP) will be required to complete the KYC process. This one-time verification is valid for transactions across all mutual funds. Submission of KYC acknowledgement is mandatory for the following :

KYC application and necessary documents as set out in the form should be submitted along-with Financial Transactions to any branch of the AMC. The KYC form after completion of IPV process can also be submitted to the Investor Service Centre of Registrar & Transfer Agent along-with Financial Transactions.

- Individual ( including NRI / PIO ) & Non Individual investors will have to produce Proof of identity, Proof of Address and other mandatory documents as set out in the KYC Application Form.

A PIO, in addition, will also be required to submit a certified true copy of the PIO Card.

The documents submitted as per the above process by the investor to the Point of Service of the Intermediaries would be forwarded to the KRA. The KRA on receipt of documents from Intermediaries would send a confirmation to investors.

Once the investor has completed the KYC process as per the revised guidelines with a SEBI registered intermediary from any KRA, the investor need not undergo the same process again with another intermediary including Mutual Funds. However, the Mutual Fund reserves the right to carry out fresh KYC of the investor. The investor needs to produce a copy of the confirmation letter received from KRA when investing for the first time with a Mutual Fund for fresh investments or additional purchases in an existing folio as per the aforesaid requirements or till his KYC status is updated successfully as per the new revised KYC norms.

Existing KYC compliant investors of the Mutual Fund, who have completed the KYC process prior to January 01, 2012, can continue to invest in Mutual Fund schemes as per the current practice i.e. by submitting along with their Financial Transaction the KYC acknowledgement issued prior to January 01, 2012 by CVL on behalf of all Mutual Funds. However it will not be applicable for investments in other securities markets. These investors, in case they wish to deal with any SEBI registered intermediary other than mutual funds, will have to follow the new KYC procedure.

An existing investor can inform the Mutual Fund to update the KYC Acknowledgement against all the folios/accounts held by him with the respective Mutual Fund. However, each of the holders in these folios/ accounts should be KYC Compliant. Applications Forms / Transaction Slips not accompanied by KYC Acknowledgement / Confirmation letter are liable to be rejected by the Mutual Fund and no transactions, will be permitted. Investors are advised to complete KYC process through KRA at the earliest.

Further, in order to ensure that the unitholder receives all communications, including redemption requests, at the new address, investors are also advised to forward any request for change of address only to same POS/ intermediaries sufficiently in advance of any transaction with the Fund House. Investors holding erstwhile KYC Compliance Acknowledgement and who have since changed their address with KFin are requested to approach POS /KRA and complete the process stated above. Kindly note

that the Mutual Fund, the AMC or the Trustees shall not be liable in case the investor does not follow the above procedure for change of address or the earlier address continues to be in the Registrar's database. Investors are advised to approach the same POS/ intermediaries from where the KYC acknowledgement was issued in case they wish to rectify any data entry mistake by POS/KRA.

**# Concept of Macaulay Duration:** The Macaulay duration (named after Frederick Macaulay, an economist who developed the concept in 1938) is a measure of a bond's sensitivity to interest rate changes. Duration tells investors the length of time, in years, that it will take a bond's cash flows to repay the investor the price he or she has paid for the bond. Fixed income securities with higher duration have higher interest rate sensitivity i.e. the changes in price of higher duration bonds are higher as compared to lower duration ones. A zero coupon bond is one which does not pay any interest and all payments are received at maturity. For a zero coupon bond, the duration is same as residual maturity Formula: There is more than one way to calculate duration, but the Macaulay duration is the most common. The formula is:

$$\text{Macaulay Duration} = \frac{\sum_{t=1}^n \left( \frac{tC}{(1+y)^t} + \frac{nM}{(1+y)^n} \right)}{P}$$

where: t = period in which the coupon is received, C = periodic (usually semiannual) coupon payment, y = the periodic yield to maturity or required yield, n = number periods, M = maturity value (in ₹), P = market price of bond Notes: Duration is quoted in "years." If a bond has a semi-annual period, we convert duration to years before quoting it (a duration of 8 semi-annual periods is 4 years). Duration is a measure of interest-rate risk. Or, stated differently, duration is a measure of how sensitive the price of a fixed-income instrument is to interest-rate changes. When we say, "The duration of the bond is 4 years," we mean: "If the interest rate on the bond goes up by 1%, the bond's price will decline by 4%."

SEBI has made it compulsory for every employee/ relationship manager/ sales person of the distributor of Mutual Fund products to quote the EUIIN obtained by him/her from AMFI in the Application Form. EUIIN, particularly in advisory transactions, would assist in addressing any instance of mis-selling even if the employee/relationship manager/sales person later leaves the employment of the distributor. Hence, if your investments are routed through a distributor please ensure that the EUIIN is correctly filled up in the Application Form.
