I. INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS:

- Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Fund will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/ Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of 1 Lac made by it towards setting up the Fund.
- The Scheme under this Scheme Information Document is not guaranteed or assured return scheme.
- Investors may note that AMC/Fund Manager's investment decisions may not be always profitable as the actual market movement may be at variance with the anticipated trend. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.

GENERAL RISK FACTORS

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.
- As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances.
- At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme. The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive returns. This may increase the risk of the portfolio.
- Investment strategy to be adopted by the Scheme may carry the risk of significant variance between the portfolio allocation of the Scheme and the Benchmark particularly over a short to medium term period.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions and taxation policies.

SCHEME SPECIFIC RISK FACTORS:

A) Risk factors associated with investing in equities and equity related instruments

- Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis. Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges. Investment in such securities may lead to increase in the scheme portfolio risk.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.

B) RISK FACTORS ASSOCIATED WITH INVESTING IN FIXED INCOME SECURITIES

- The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to varying degree of credit risk or default (i.e. the risk of an issuer's inability to meet interest or principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. The Investment Manager will endeavour to manage credit risk through in-house credit analysis. This may increase the risk of the portfolio. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, AAA rated bonds are comparatively less risky than AA rated bonds.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates and are subject to issuer default risk. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.
- Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.
- **Prepayment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Settlement risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.
- The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.

C) RISK FACTORS ASSOCIATED WITH INVESTMENT IN TRI-PARTY REPO:

The Fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL).

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated,

CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The Fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the Fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

D) RISK FACTORS ASSOCIATED WITH INVESTING IN NON- CONVERTIBLE PREFERENCE SHARES

- **Credit Risk** - Credit risk is the risk that an issuer will be unable to meet its obligation of payment of . Income Distribution Cum Withdrawal and/ or redemption of principal amount on the due date. Further, for non-cumulative preference shares, issuer also has an option to not pay Income Distribution Cum Withdrawal on preference shares in case of inadequate profits in any year.
- **Liquidity Risk** - The preference shares generally have limited secondary market liquidity and thus we may be forced to hold the instrument till maturity.
- **Unsecured in nature** - Preference shares are unsecured in nature and rank lower than secured and unsecured debt in hierarchy of payments in case of liquidation. Thus, there is significant risk of capital erosion in case the company goes into liquidation.

E) RELATED TO JM MIDCAP FUND

While Small & Mid-cap stocks gives one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that Small & Mid-cap stocks can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in Small & Midcap stocks are more than investing in stocks of large well established companies. It should be noted that over a period of time, Small, Mid and Large cap stocks have demonstrated different levels of volatility and investment returns. And it is important to note that generally, no one class consistently outperforms the others.

F) RISK RELATED TO INVESTING IN DEBT / BONDS / MONEY MARKET INSTRUMENTS / UNITS OF LIQUID / MONEY MARKET / DEBT MUTUAL FUND SCHEMES:

a) Interest Rate Risk

As with all debt securities, changes in interest rates will affect the NAVs of the Scheme as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long term securities generally fluctuate more in response to interest rate changes than of shorter-term securities. Interest rate movements in the Indian debt markets can be volatile leading to the possibility of large price movements up or down in debt and money market securities and thereby to possibly large movements in the NAV.

b) Liquidity or Marketability Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio.

c) Credit Risk

Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk, debentures are sold at a yield spread above those offered on treasury securities which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.

e) Reinvestment Risk:

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested will fall.

f) Rating Migration Risk:

Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.

- g) Basis Risk (Interest - rate movement):** During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.

- h) **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- i) **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- j) Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.

G) SOME OF THE OTHER RISKS OF INVESTING IN DEBT AND MONEY MARKET SECURITIES ARE :

- a. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive yields. This may increase the risk of the portfolio.
- b. The Scheme at times may receive large number of redemption requests, leading to an asset- liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- c. Investment in unrated instruments may involve a risk of default or decline in market value higher than rated instruments due to adverse economic and issuer-specific developments. Such investments display increased price sensitivity to changing interest rates and to a deteriorating economic environment. The market values for unrated investments tends to be more volatile and such securities tend to be less liquid than rated debt securities.
- d. Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Schemes.

H) RISKS ASSOCIATED WITH STOCK LENDING

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

I) RISKS ASSOCIATED WITH INVESTING IN TRI PARTY REPO THROUGH CCIL (TREPS)

The Fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments.

CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall".

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

J) REDEMPTION RISK

As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or a restructuring of the Scheme.

K) RISK RELATING TO DERIVATIVES

- i. The Scheme may use various derivative products as permitted by the Regulations. In the derivative markets there are risk factors and issues concerning the use of derivatives that investors should understand. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to manage the risks as a result of the failure of the counterparty to comply with the terms of the derivative contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives, credit risk where the danger is that of a counterparty failing to honour its commitment, liquidity risk where the danger is that the derivatives cannot be sold at prices that reflect the underlying assets, rates and indices and price risk where the market price may move in adverse fashion.
 - ii. The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
 - iii. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- **Credit Risk:** The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
 - **Market Risk:** Market movements may adversely affect the pricing and settlement derivatives.
 - **Illiquidity Risk:** This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

L) RISK FACTORS ASSOCIATED WITH PROCESSING OF TRANSACTION THROUGH STOCK EXCHANGE MECHANISM:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE, on any Business Day will depend upon the modalities of processing viz. collection of application form, Account opening form, cancelled cheque, KYC documentation, order processing/ settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

M) RISK FACTORS ASSOCIATED WITH REITS AND INVITS

Price Risk: Securities/Instruments of REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. The extent of fall or rise in the prices is a fluctuation in general market conditions, factors and forces affecting capital market, Real Estate and Infrastructure sectors, level of interest rates, trading volumes, settlement periods and transfer procedures.

Interest Rate Risk: Securities/Instruments of REITs and InvITs run interest rate risk. Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.

Credit Risk: Credit risk means that the issuer of a REIT/InvIT security/ instrument may default on interest payment or even on paying back the principal amount on maturity. Securities/ Instruments of REITs and InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.

Liquidity Risk: This refers to the ease with which securities/instruments of REITs/InvITs can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities/instruments for which a liquid market exists. As these products are new to the market they are likely to be exposed to liquidity risk.

Reinvestment Risk: Investments in securities/instruments of REITs and InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or Income Distribution Cum Withdrawal pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

Legal and Regulatory Risk: The regulatory framework governing investments in securities/instruments of REITs and InvITs comprises a relatively new set of regulations and is therefore untested, interpretation and enforcement by regulators and courts involves uncertainties. Presently, it is difficult to forecast as to how any new laws, regulations or standards or future amendments will affect the issuers of REITs/InvITs and the sector as a whole. Furthermore, no assurance can be given that the regulatory system will not change in a way that will impair the ability of the Issuers to comply with the regulations, conduct the business, compete effectively or make distributions.

N) RISKS ASSOCIATED WITH SEGREGATED PORTFOLIO:

- a. Unit holders holding units of segregated portfolio may not be able to liquidate their holdings till recovery of money from the issuer.
- b. Security in the segregated portfolio may not realize any value.
- c. Listing of any units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.
- d. The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

B. RISK MITIGATION MEASURES FOLLOWED:

Risk management is an integral part of the investment process. In line with Para-no 4.3.1 of SEBI Master Circular the AMC has incorporated adequate safeguards for controlling risks in the portfolio construction process, which would be periodically evaluated. Online monitoring of various exposure limits are done by the Front Office System. The system incorporates all the investment restrictions as per SEBI guidelines and 'soft' warning alerts at appropriate levels for preemptive monitoring. The system also enables identifying & measuring the risk through various risk measurement tools and analyzes the same so as to act in a preventive manner. In addition to minimize the major risks for equity schemes, the following steps are taken:

1. The AMC may also implement certain internal control procedures / risk & exposure limits etc., which may be varied from time to time
2. **Market Risk / Volatility Risk** – Risk of adverse price movements in the portfolio
The portfolio would be adequately diversified to mitigate volatility depending on its respective mandate. Volatility would be monitored with respect to the benchmark and peer set.
3. **Liquidity Risk** – Risk if liquidity impact of entering/exiting the underlying stocks in the portfolio. The fund manager may keep some portion of the portfolio in debt and money market instruments and/or cash within the specified asset allocation framework for the purpose of meeting redemptions. The overall liquidity of the schemes are monitored periodically and necessary action taken on the portfolios, if required.

C. REQUIREMENT OF MINIMUM INVESTORS/ INVESTMENT IN THE SCHEME

(Applicability for an open-ended scheme)

The Scheme/ plan (at portfolio level) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/ Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 day's notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

4. Creation of segregated portfolio:

In case of a credit event at issuer level and to deal with liquidity risk, the AMC may create a segregated portfolio of debt and money market instruments including unrated or money market instruments of an issuer that does not have outstanding rated debt or money market instruments, under the Scheme in compliance with the Para-no 4.4 of SEBI Master Circular.

In this regard, the term 'segregated portfolio' shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a Fund scheme, the term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio and the term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

The AMC may create a segregated portfolio in a Fund scheme in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- a. Downgrade of a debt or money market instrument to 'below investment grade', or
- b. Subsequent downgrades of the said instruments from 'below investment grade', or
- c. Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as detailed above and implemented at the ISIN level. Creation of segregated portfolio shall be optional and at the discretion of the AMC.

Further, the AMC shall seek approval of the Trustees prior to creation of the segregated portfolio.

Process for creation of segregated portfolio

The AMC shall decide on creation of segregated portfolio of the Scheme on the day of credit event. Segregation of portfolio in case of unrated debt or money market instruments will be done only in case of actual default of either the interest or principal amount by the issuer of such instruments. The AMC shall inform AMFI immediately about the actual default by the issuer. Once the AMC decides to segregate portfolio, the AMC shall:

- a. seek approval from the Board of Directors of the Trustee, prior to creation of the segregated portfolio.
- b. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors of the Scheme. The AMC shall work out with the R&T viz. KFin Technologies Ltd., the mechanics of unit creation to represent the holding of segregated portfolio and the same shall appear in the account statement of the unit holders.
- vi. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
If the Trustee does not approve the proposal to create a segregated portfolio, the AMC shall issue a press release immediately informing investors about the same. Thereafter, the transactions shall be processed as usual at the applicable NAV.

Valuation and processing of subscriptions and redemptions:

Notwithstanding the decision to segregate the debt and money market instrument, the valuation process shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI MF Regulations, 1996 and SEBI Master Circular issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable, will be processed as per the existing SEBI circular on applicability of NAV as under:

1. Upon receipt of Trustee approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV.
2. In case the Trustee does not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

TER for the Segregated Portfolio:

- The AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in the segregated portfolio.
- The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
- The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Disclosures:

- A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the Fund and the Scheme.
- The Net Asset Value (NAV) of the segregated portfolio shall also be declared on daily basis along with the NAV of the main portfolio.
- The information regarding number of segregated portfolios created in the Scheme shall appear prominently under the name of the Scheme at all relevant places such as SID, KIM-cum- Application Form, advertisement, AMC and AMFI websites, etc.
- The performance of the Scheme required to be disclosed at various places shall include the impact of creation of segregated portfolio and shall clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the performance table. Such information in the scheme related documents and Scheme performance shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustee:

In order to ensure timely recovery of investments of the segregated portfolio, the Trustee shall ensure that:

- The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.

- An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every Trustee meeting till the investments are fully recovered/ written-off.
- The Trustee shall monitor the compliance of the above mentioned SEBI Master Circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, the Trustee shall have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officer (CIO), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the Scheme.

Example of Segregated Portfolio:

The below table shows how a security affected by a credit event will be segregated and its impact on investors. Whether the distressed security is held in the original portfolio or the segregated portfolio, the value of the investors' holdings will remain the same on the date of the credit event.

Key assumptions:

Let us assume a Scheme consists of 4 Securities (A, B, C and D). It has two investors with total of 10,000 units (Investor 1 with 7,000 units, Investor 2 with 3,000 units).

Total Portfolio Value of Rs. 40 Lakhs (Each Security invested Rs. 10 Lakh). Current NAV: $40,00,000/10,000 = \text{Rs. } 400$ Per Unit.

Suppose Security A is downgraded to below investment grade and consequently the value of the security falls from Rs. 10,00,000 to Rs. 4,00,000 and the AMC decides to segregate the security into a new portfolio, then the Investors will be allotted the same number of units in the segregated portfolio as they hold in the main portfolio. So, Investor 1 will get 7,000 Units and Investor 2 will get 3,000 units in the segregated portfolio.

With Segregation, the Portfolio Value is Rs. 34,00,000 (Now B, C and D Securities worth Rs. 30 Lakh and Security A has fallen from Rs. 10,00,000 to Rs. 4,00,000).

	Main Portfolio (Security of B, C & D)	Segregated Portfolio (Security A)
Net Assets	Rs. 30,00,000	Rs. 4,00,000
Number of Units	10,000	10,000
NAV per Unit	$\text{Rs. } 30,00,000/10,000 = \text{Rs. } 300$	$\text{Rs. } 4,00,000/10,000 = \text{Rs. } 40$

With respect to Investors:

	Investor 1	Investor 2
Units held in Main portfolio (No. of Units)	7,000	3,000
NAV of Main Portfolio	Rs. 300 per Unit	Rs. 300 per Unit
Value of Holding in Main Portfolio (A) (Rs.)	21,00,000	9,00,000
Units Held in Segregated Portfolio	7,000	3,000
NAV of Segregated Portfolio	Rs. 40 Per unit	Rs. 40 Per unit
Value of Holding in Segregated Portfolio (B) (Rs.)	2,80,000	1,20,000
Total Value of Holdings (A) + (B) (Rs.)	23,80,000	10,20,000

In case if it does not segregate (Total Portfolio would be)

Net Assets of the Portfolio Rs. 34,00,000	No. of Units	NAV per unit Rs.
(Rs. 4,00,000 in Security A and	10,000	34,00,000/
Rs. 10,00,000 in Security B and		10,000 = Rs. 340
Rs. 10,00,000 in Security C and		
Rs. 10,00,000 in Security D)		

	Investor 1	Investor 2
Units held in Original portfolio (No. of Units)	7,000	3,000
NAV of Original Portfolio	Rs. 340 Per Unit	Rs. 340 Per Unit
Value of Holding (Rs.)	23,80,000	10,20,000

Value of the Portfolio would be as follows at different stages/ scenarios:

Sr. No.	Stage /Scenario	Portfolio	Value
I	Before Credit Event	Security A	Rs. 10,00,000
		Security B	Rs. 10,00,000
		Security C	Rs. 10,00,000
		Security D	Rs. 10,00,000
		Total Portfolio Value (Security A, B, C & D)	Rs. 40,00,000
II	On Credit Event if Portfolio is not Segregated	Security A	Rs. 4,00,000
		Security B	Rs. 10,00,000
		Security C	Rs. 10,00,000
		Security D	Rs. 10,00,000
		Total Portfolio Value (Security A, B, C & D)	Rs. 34,00,000
III	On Credit Event if Portfolio is segregated	Main Portfolio:	
		Security B	Rs. 10,00,000
		Security C	Rs. 10,00,000
		Security D	Rs. 10,00,000
		Segregated Portfolio:	
		Security A	Rs. 4,00,000
		Total Portfolio Value (Security A, B, C & D)	Rs. 34,00,000

Investors may note the essential difference between a segregated portfolio and non-segregated portfolio as follows:

- Where the portfolio is not segregated, the transactions will continue to be processed at NAV based prices. There will be no change in the number of units remaining outstanding.
- Where the portfolio is segregated, equal number of units are created and allotted to reflect the holding for the portion of portfolio that is segregated.
- Once the portfolio is segregated, the transactions will be processed at NAV based prices of main portfolio
- Since the portfolio is segregated for distressed security, the additional units that are allotted cannot be redeemed. The units will be listed on the recognised stock exchange to facilitate exit to unit holders.
- Upon realisation of proceeds under the distressed security either in part or full, the proceeds will be paid accordingly. Based on the circumstances and developments, the AMC may decide to write off the residual value of the segregated portfolio.

The AMC / Fund shall adhere to such other requirements as may be prescribed by SEBI / AMFI in this regard.

DEBT MARKET IN INDIA:

The Indian Debt market comprises of the Money Market and the Long Term Debt Market.

Money market instruments are Commercial Papers (CPs), Certificates of Deposit (CDs), Treasury bills (T-bills), Repos, Inter-bank Call money deposit, Triparty Repos on Government Securities or treasury bill, etc. They are mostly discounted instruments that are issued at a discount to face value.

Money market instruments have a tenor of less than one year while debt market instruments typically have a tenor of more than one year. Long Term Debt market in India comprises mainly of two segments viz., the Government securities market and the corporate securities Market. Government securities includes central, state and local issues. The main instruments in this market are Dated securities (Fixed or Floating) and Treasury bills (Discounted Papers). The Central Government securities are generally issued through auctions on the basis of 'Uniform price' method or 'Multiple price' method while State Govt. are through on-tap sales.

Corporate debt segment on the other hand includes bonds/debentures issued by private corporates, public sector units (PSUs) and development financial institutions (DFIs). The debentures are rated by a rating agency and based on the feedback from the market, the issue is priced accordingly. The bonds issued may be fixed or floating. The floating rate debt market has emerged as an active market in the rising interest rate scenario. Benchmarks range from Overnight rates or Treasury benchmarks.

Debt derivatives market comprises mainly of Interest Rate Swaps linked to Overnight benchmarks called MIBOR (Mumbai Inter Bank Offered Rate) and is an active market. Banks and corporate are major players here and Mutual Funds have also started hedging their exposures through these products.

Securitized Debt Instruments – Asset securitization is a process of transfer of risk whereby commercial or consumer receivables are pooled packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific Receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments to investors, which are rated by an independent credit rating agency. Bank, Corporates, Housing and Finance companies generally issue securitized instruments. The underlying receivables generally comprise of loans of Commercial Vehicles, Auto and Two wheeler pools, Mortgage pools (residential housing loans), Personal Loan, credit card and Corporate receivables. The instrument, which is issued, includes loans or receivables maturing only after all receivables are realized. However depending on timing of underlying receivables, the average tenure of the securitized paper gives a better indication of the maturity of the instrument.

- b. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for the Mutual Fund in equity index futures contracts:

- a. The Mutual Fund position limit in equity index futures contracts on a particular underlying index shall be higher of Rs. 500 crores or 15% of the total open interest in the market in equity index futures contracts.
- b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, the Mutual Fund may take exposure in equity index derivatives subject to the following limits:

1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
 2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.
- iv. **Position limit for the Mutual Fund for stock based derivative contracts**
1. The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts, will be as follows:
 2. The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).
- v. **Position limit for each scheme of a Mutual Fund**
- The position limits for each scheme of the mutual fund and disclosure requirements shall be identical to that prescribed for a sub-account of a FPI. Therefore, the scheme-wise position limit / disclosure requirements shall be:
1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of: 1% of the free float market capitalisation (in terms of number of shares).
Or
5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
 2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
 3. For index based contracts, the Mutual Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.
- The enhanced limits will enable participants, to hedge their positions more effectively, especially for stocks with large market capitalization and higher liquidity. Separate position limits have been built in for stock options in order to provide an impetus for the options market.
- JM Financial Mutual Fund will act in accordance with the rules and regulations as may be prescribed by SEBI in this regard from time to time.

Strategies that employ index futures:

The Scheme has an existing equity portion invested in a basket of stocks. In case the fund manager has a view that the equity markets are headed downwards, the Scheme can then hedge the exposure to equity either fully or partially by initiating short futures positions in the index. A similar position in the long direction can also be initiated by the Scheme to hedge its position of cash and permissible equivalents.

Risks

The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The long position in the Nifty will have as much loss as the gain in the short portfolio if hedged completely and would be vice versa if we were holding long portfolio short index.

To the extent permissible by extant regulations, the Scheme can initiate a naked short position in an underlying index future traded on a recognized stock exchange. In case the nifty future contract is trading at say, Rs. 1850, and the fund manager has a view that it will depreciate going forward, the Scheme can initiate a sale transaction of nifty futures at Rs.1850 without holding a portfolio of equity stocks or any other underlying long equity position. Once the price falls to Rs. 1800 after say, 20 days the Scheme can initiate a square-up transaction by buying the said futures and book a profit of Rs. 50. Correspondingly the Scheme can take a long position without an underlying cash/ cash equivalent subject to the extant regulations.

Strategies that employ stock specific futures:

Individual stock futures are also available in the Indian equity markets. Stock futures trade either at a premium or at discount to the spot prices, the level of premium generally reflects the cost of carry. Stock specific issues may have a bearing on futures as speculators may find futures as a cost-effective way of executing their view on the stock. However such executions usually increase the premium/discount to the spot significantly, thereby giving rise to arbitrage opportunities for a Scheme. The Scheme will also look at mispricing opportunities to generate returns through shorts on specific stock futures within the applicable limits for the Fund. These strategies have been explained below.

(a) Selling spot and buying future : In case the Scheme holds the stock of a company at say Rs. 1000 while in the futures market it trades at a discount to the spot price say at Rs. 980 then the Scheme may sell the stock and buy the futures. On the date of expiry of the stock future, the Scheme may reverse the transactions (i.e. buying at spot & selling futures) and earn a risk-free Rs. 20 (2% absolute) on its holdings. If on the date of expiry of the futures, if the stock trades at Rs. 1100 which would be the price of the futures too, the Scheme will have a benefit of Rs. 100 whereby the Scheme gets the 10% upside movement together with the 2% benefit on the arbitrage, and thus getting a total return of 12%.

Risks

While futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for the Scheme to purchase or close out a specific futures contract.

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

(b) Buying spot and selling future : A company trading in the spot market at Rs. 1000 while it trades at Rs. 1020 in the futures market then the Scheme may buy the stock at spot and sell in the futures market thereby earning Rs. 20. In case of adequacy of cash with the Scheme, this strategy may be used to enhance returns of the Scheme which was otherwise sitting on cash.

Risks

While futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for scheme to purchase or close out a specific futures contract.

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

(c) Buying stock future : Where the Scheme wants to initiate a long position in a stock whose spot price is at say, Rs.1 000 and futures is at Rs. 980, then the Scheme may just buy the futures contract instead of the spot thereby benefiting from a lower cost option.

Risks

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

(d) Selling stock future : In case the Scheme has a bearish view on a stock which is trading in the spot market at Rs. 1000 and the futures market at say Rs. 980. The Scheme can express such a view subject to extant SEBI regulations by initiating a short position in the futures contract. In case the view is right and the futures price depreciates to say Rs. 900 the Scheme can square up the short position thereby earning a profit of Rs. 80.

Options :

Option contracts are of two types - Call and Put; the former being the right, but not obligation, to purchase a prescribed number of shares at a specified price before or on a specific expiration date and the latter being the right, but not obligation, to sell a prescribed number of shares at a specified price before or on a specific expiration date. The price at which the shares are contracted to be purchased or sold is called the strike price. Options that can be exercised on or before the expiration date are called American Options, while those that can be exercised only on the expiration date are called European Options.

Option contracts are designated by the type of option, name of the underlying, expiry month and the strike price.

Numerical examples of Options Call

Call Option: The Scheme buys a call option at the strike price of say Rs.1 000 and pays a premium of say Rs. 50, the Scheme would earn profits if the market price of the stock at the time of expiry of the option is more than Rs. 1050 being the total of the strike price and the premium thereon. If on the date of expiry of the option the stock price is below Rs. 1000, the Scheme will not exercise the option while it loses the premium of Rs. 50.

Risks

In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.

Put Option (Buy): In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.

Put Option (Buy): Lets say, we have a stock 'A' in the scheme that is completely hedged by buying a Put Option of 'A'. The Scheme buys a Put Option at Rs. 1000 by paying a premium of say Rs. 50. If the stock price goes down to Rs. 900, the Scheme would protect its downside and would only have to bear the premium of Rs. 50 instead of a loss of Rs. 100, whereas if the stock price moves up to say Rs. 1100 the Scheme may let the Option expire and forego the premium thereby capturing Rs. 100 upside after bearing the premium of Rs.50.

Risks

In case of buying options either call / put, the maximum loss would be the premium paid in case of options expiring out of the money.

The above option positions can be initiated in both index based options as well as stock specific options. Permissible strategies involving index options and stock specific options would be the same as that of index futures and stock specific futures respectively.

The AMC retains the right to enter into such derivative transactions and to such extent as may be permitted by the applicable regulations from time to time.

Valuation of Derivative Products:

- The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the SEBI Regulations, as amended from time to time.

2. The Scheme shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme.
4. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following :
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions shall not be taken for existing derivative positions. Exposure due to such positions shall be added and treated under limits mentioned in Point 1.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
5. The Scheme may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
6. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.
7. Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under and will be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Contracts Premium Paid * Lot Size * Number of Contracts

The derivative transactions shall also be disclosed in the half yearly portfolio/ annual report of the schemes in the specified format.

- i. Para-no. 12.25 of SEBI Master Circular pertaining to norms for investment and disclosure by mutual funds in derivatives, the following is prescribed in para 12.25.9 of SEBI Master Circular pertaining to hedging of interest rate risk:

To reduce interest rate risk in a debt portfolio, mutual funds may hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below:

$(\text{Portfolio Modified Duration} * \text{Market Value of the Portfolio})$

$(\text{Futures Modified Duration} * \text{Futures Price} / \text{PAR})$

- ii. In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging.
- iii. Imperfect hedging using IRFs may be considered to be exempted from the gross exposure, upto maximum of 20% of the net assets of the scheme, subject to the following:

Exposure to IRFs is created only for hedging the interest rate risk based on the weighted average modified duration of the bond portfolio or part of the portfolio.

Mutual Funds are permitted to resort to imperfect hedging, without it being considered under the gross exposure limits, if and only if, the correlation between the portfolio or part of the portfolio (excluding the hedged portions, if any) and the IRF is atleast 0.9 at the time of initiation of hedge. In case of any subsequent deviation from the correlation criteria, the same may be rebalanced within 5 working days and if not rebalanced within the timeline, the derivative positions created for hedging shall be considered under the gross exposure computed in terms of paragraph 12.24.1 of the SEBI Master Circular. The correlation should be calculated for a period of last 90 days.

Explanation: If the fund manager intends to do imperfect hedging upto 15% of the portfolio using IRFs on weighted average modified duration basis, either of the following conditions need to be complied with:

The correlation for past 90 days between the portfolio and the IRF is at least 0.9 or

The correlation for past 90 days between the part of the portfolio (excluding the hedged portions, if any) i.e. at least 15% of the net asset of the scheme (including one or more securities) and the IRF is at least 0.9.

At no point of time, the net modified duration of part of the portfolio being hedged should be negative.

The portion of imperfect hedging in excess of 20% of the net assets of the scheme should be considered as creating exposure and shall be included in the computation of gross exposure in terms of paragraph 12.24.1 of the SEBI Master Circular.

- iii. The basic characteristics of the scheme should not be affected by hedging the portfolio or part of the portfolio (including one or more securities) based on the weighted average modified duration.

Explanation: In case of long term bond fund, after hedging the portfolio based on the modified duration of the portfolio, the net modified duration should not be less than the minimum modified duration of the portfolio as required to consider the fund as a long term bond fund.

- iv. The interest rate hedging of the portfolio should be in the interest of the investors.

Mutual Fund schemes may imperfectly hedge their portfolio or part of their portfolio using IRFs, subject to the following conditions:

Prior to commencement of imperfect hedging, existing schemes shall comply with the provisions of Regulation 18 (15A) of SEBI (Mutual Funds) Regulations, 1996 and all unit holders shall be given a time-period of at least 30 days to exercise the option to exit at prevailing NAV without charging of exit load.

The risks associated with imperfect hedging shall be disclosed and explained by suitable numerical examples in the offer documents and also needs to be communicated to the investors through public notice or any other form of correspondence.

In case of new schemes, the risks associated with imperfect hedging shall be disclosed and explained by suitable numerical examples in the offer documents.

D. WHAT IS THE INVESTMENT STRATEGY?

Scheme Specific Investment Strategy

The Scheme shall follow a predominantly Mid cap strategy with a minimum exposure of 65% to Mid-Cap stocks. The Scheme may also seek participation in other equity and equity related securities to achieve optimal portfolio construction.

The aim of equity strategy will be to predominantly build a portfolio of mid-cap companies which have:

- a) reasonable growth prospects
- b) sound financial strength
- c) sustainable business models
- d) acceptable valuation that offers potential for capital appreciation.

The Scheme aims to maintain a reasonably diversified portfolio at all times.

The Scheme may also invest a certain portion of its corpus in debt and money market securities. Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook.

The Scheme may also invest in the hybrid securities viz. units of REITs and InvITs for diversification and subject to necessary stipulations by SEBI from time to time.

Subject to the Regulations and the applicable guidelines, the Scheme may, engage in Stock Lending activities.

The Scheme may also invest in the schemes of Mutual Funds.

Besides the above, the following will be the broad investment strategies.

(i) Scientific approach to investment

The Fund adopts a scientific approach to investments. Securities are selected for various funds by the fund managers based on a continuous study of trends in industries and companies, including management capabilities, global competitiveness, earning power, growth / payout features and other relevant investment criteria, which would, inter-alia include evaluation of the outlook of the economy, exposure to various industries and geographical regions, evaluation of the intrinsic worth of specific opportunities such as primary market transactions, private placements, trading opportunities etc.

(ii) Liquidity Management

The Fund Manager may invest in short term deposits of scheduled commercial banks pending deployment of funds in line with para- no. 12.16 of SEBI Master Circular, till suitable opportunities are present. The Scheme may also keep a portion in cash or near cash for meeting the expenses of the Scheme/ redemption and Income Distribution Cum Capital Withdrawal payout / or current collections pending for deployment etc.

(iii) Mode of Investment

The securities in which the investment manager may invest would be through primary as well as secondary market, private placement etc. These securities may be those listed on various stock exchanges as well as unlisted securities.

(iv) Procedure for taking investment decisions

The investment policy of the AMC has been determined by the Investment Advisory Committee ("IAC") which has been approved by the Boards of the AMC and Trustee. At the strategic level, the broad investment philosophy of the AMC and the authorised exposure limits are spelt out in the Investment Policy of the Fund and the SEBI Regulations. During trading hours, the Fund Managers have the discretion to take investment decisions for the Scheme within the limits defined in the SEBI Regulations and the Investment Policy of the Fund.

The designated Fund Manager of the Scheme will be responsible for taking day-to-day investment decisions and will inter-alia be responsible for asset allocation, security selection and timing of investment decisions.

(v) Portfolio Turnover Policy

The AMC as such does not have a policy statement on portfolio turnover for Scheme. However, the general portfolio management style is biased towards maintaining a low portfolio turnover rate. In the debt market, trading opportunities may arise due to changes in interest rate policy announced by the Reserve Bank of India, shifts in the yield curve, credit rating changes or any other factors where in the opinion of the fund manager there is an opportunity to enhance the total return of the portfolio.

(vi) Investment by AMC/Sponsor in the Scheme

The AMC and investment companies managed by the Sponsor(s), their associate companies and subsidiaries may invest either directly or indirectly in the Scheme. The associates, the Sponsor, subsidiaries of the Sponsor and/or the AMC may acquire a substantial portion of the Scheme's units and collectively constitute a major investment in the Scheme. Consequently in the event of repurchase of units held by such associates and Sponsor, there be an adverse impact on the units of the Scheme as the timing of such repurchase may impact the ability of other unitholders to repurchase their units. The AMC reserves the right to invest its own funds in the Scheme as may be decided by the AMC from time to time.

The AMC may invest in the Scheme at any time during the NFO and continuous offer period subject to the SEBI Regulations & circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time. As per the existing SEBI Regulations, the AMC will not charge investment management and advisory fee on the investment made by it in the Scheme.

Further, the AMC shall based on the risk value assigned to the scheme, shall invest minimum amount as a percentage of assets under management of the scheme, Pursuant to para-no. 6.9.2 of SEBI Master Circular.

During the NFO period, AMC's investment shall be made during the allotment of units and shall be calculated as a percentage of the final allotment value excluding AMC's investment.

(vii) Inter Scheme Investments

The Scheme may invest in other Schemes managed by the AMC or in the Schemes of any other Mutual Funds, provided it is in conformity to the investment objectives of the investor Scheme and in terms of the prevailing SEBI Regulations. As per the SEBI Regulations, no investment management fees will be charged for such investments and the aggregate inter Scheme investment made by all Schemes of JM Financial Mutual Fund or in the schemes under the management of other asset management companies shall not exceed 5% of the net asset of the Fund as on date of the investment.

IMPORTANT

It must be clearly understood that the above referred portfolio strategies are not absolute, and that they can vary substantially depending upon the Fund Manager's perception as to whether the stock/debt market is in an overheated state or has fallen well below a level they consider appropriate taking into account the factors prevailing at that time, the intent being to protect the Unitholders interest, especially the NAV of the Fund.

The Fund Manager may, from time to time, at her absolute discretion review and modify the strategy, provided such modification is in accordance with SEBI Regulations.

The performance will be benchmarked to the Total Returns Variant of the Index.

The IAC is operational at the AMC level and has majority representation from the independent Directors. Monthly reports on the performance of the schemes with appropriate benchmark indices as also with the relative performance of the schemes of other mutual funds schemes in the same category is placed before the Boards of the AMC and Trustee. The applicable exit load, if any, will be charged for redemptions/ switch outs of the Scheme (i.e. at portfolio level) before the completion of the stipulated load/ lock-in period. The stipulated load/ lock-in period will be reckoned from the date of allotment of units for a particular transaction in the Scheme (i.e. at portfolio level) till the date of redemption / switch out from that scheme, irrespective of the number of intra-scheme switches by the investor between the aforementioned two dates (e.g. switches between plans/sub-plans/options/sub-options within the Scheme having the same portfolio) • The extant provisions of applicability of load on redemptions/ switches from one Scheme to another will continue to be applicable. <p>Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Plan.</p> <p>Applicable NAV and allotment of units:</p> <p>The provisions of applicability of NAV and allotment of units will be same for Regular and Direct plan.</p> <p>Eligible investors / modes for applying: All categories of investors (whether existing or new Unitholders), as permitted under the SID of the Scheme, are eligible to subscribe under Direct Plan. Investors subscribing under Direct Plan of the Scheme will have to indicate "Direct Plan" against the Scheme name in the application form/ transaction slip e.g. "JM Midcap Fund (Direct)". b. Investors may also indicate "Direct" in the ARN column of the application form/ transaction slip. However, in case Distributor/ Sub- broker code is mentioned in the application form, but "Direct Plan" is indicated against the Scheme name or in any other place or in any manner whatsoever in the Application Form/ transaction slip, the Distributor/ Sub-broker code will be ignored and the application will be processed under Direct Plan.

c. Further, where application is received for Regular Plan without Distributor code or the word "Direct" is mentioned in the ARN Column, the application will be processed under the Direct Plan.

Investments through systematic routes:

(a) In case of Systematic Investment Plan ("SIP") / Systematic Transfer Plan ("STP") etc. registered prior to the Effective Date without any distributor code under the Regular Plan, installments falling on or after the Effective Date will automatically be processed under the Direct Plan only.

(b) Investors who had registered for SIP facility prior to the Effective Date with distributor code shall continue under the Regular Plan. However if the investor wishes that their future installments be invested into the Direct Plan, he shall make a written request to the Fund in this behalf. The Fund will take at least 15 Business days to process such requests. Intervening installments will continue in the Regular Plan.

In case of (a) and (b) above, the terms and conditions of the existing registered enrolment such as tenure, amount of the SIP etc. shall continue to apply.

(c) In case of Systematic Transfer Facilities which were registered with a Distributor Code under the Regular Plan prior to the Effective Date, the future installments under the said Facilities shall continue as under the Regular Plan

In case such investors wish to invest under the Direct Plan through these facilities, they would have to cancel their existing enrolments and register afresh for such facilities.

Redemption requests: Where Units under the Scheme are held under both Regular and Direct Plans and the redemption/ Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number).

In the event of the investor not clearly mentioning the name of the Plan (Regular or Direct)/ Option/ Sub-option/or wherever there is an ambiguity in choice of Plan (Regular or Direct)/ Option/ Sub-option opted for in the request for redemption/switch-out of all/specified amount/units, in the absence of clarificatory letter from the investor on the day of the transaction, the AMC/ Registrar reserves the right to process the redemption/switch out request from the Regular Plan or Direct Plan if such redemption request can be processed in totality. In such case, the redemption will first be effected from the Regular Plan.

E.g. If an investor has investment of Rs. 5 lakh in an Regular Plan and Rs. 10 lakh in the Direct Plan and a redemption request is received from him for redemption of Rs. 2 lakh without indicating which Plan the redemption is to be effected from, the AMC/ Registrar will effect the redemption from the Regular Plan. In the same example, if the redemption request was for Rs. 7 lakh, the redemption would be effected from the Direct Plan.

However, in case it is not possible to effect the redemption from any one of the Plans in totality i.e. either from the Regular or from the Direct Plan, such redemption request will be treated as void ab-initio and rejected.

E.g. If the redemption request in the above example is for Rs. 12 lakh, the AMC / Registrar will summarily reject the redemption request. Where units are held under any one i.e. under Regular or Direct Plan, the redemption will be processed from such Plan.

Tax consequences: Switch / redemption may entail tax consequences. Investors should refer to the tax paras set out elsewhere in the document as well as consult their professional tax advisor before initiating such requests.

2. Investors will have to submit duly filled-in and signed Redemption/ Repurchase Request Form (RRF) available with respective DPs. Normally, these RRF may be available on the websites of respective DPs e.g. Banks etc. As the format of RRF may be different with every DP, the investors are advised to use the RRF procured from their own DP to avoid rejections/delays by their own DP. The ISIN of the Scheme/ plan/ sub-plan is printed on the Statement of Account issued to investors.
3. The investors are required to submit 3 copies of RRF to their DPs. One copy of the RRF is used by the DP for issuing acknowledgement to investors whereas the second copy of the RRF will be forwarded by the DP to the Head Office of the RTA i.e M/s KFin Technologies Ltd. The third copy will be retained by the DP for their own records.
4. Based on the receipt of RRF, if found in order, the DP concerned generates Electronic Redemption Request and blocks the units applied for redemption in the NSDL/CDSL system immediately. After this, the investor will not be able to transfer the blocked units to anyone (i.e. cannot transfer to anyone).
5. The Electronic Requests generated up to the stipulated cut off time which is currently 3 pm every day by DPs shall get transmitted from NSDL / CDSL to respective Registrars of Mutual Fund by 4 - 6 pm.

16. In case, any particular SIP due date falls on a non-business day or falls during a book closure period, the immediate next business day will be considered for the purpose of initiating the process of realization of SIP Instalment's amount. *Any date from 1st to 28th of a month. In case, the SIP transaction date is a Non – Business day, the SIP will be processed on the immediate next business day.

- In case the end period is not specified, the default STP end period will be considered as perpetual.
- Daily STP is eligible for cycle dates of 1st to 28th as under:
- For the dates from 1st to 28th:
 - If the chosen date is a business day, the STP shall be processed on that specified date.
 - In case, the chosen date is a non-business day, the STP shall be processed on the next business date.

7. Further, in case of a last STP, where the balance amount is less than the STP amount, the entire amount will be transferred to the transferee scheme.

STP frequencies

1. **STP:** An investor may choose any of the due dates for effecting STP from the above table based on his/her/their choice for a Weekly/ Fortnightly/Monthly/Quarterly STP . The investor may choose multiple dates and multiple frequencies for any Options of any Scheme as per his perception/need/risk-diversification by submitting separate application forms.

The investor has the following options for Daily STP based on the needs and desire to diversify and benefit from the market volatility.

(i) Daily (Chhota) STP

In order to enable the investors to avail of the benefit of the daily volatility in the stock markets, a Daily STP (Chhota STP) facility is available to investors. An investor may opt for Daily STP of Rs. 100/- or in multiples of any amount in full rupee terms, on every Business Day against his other live investment made in lump sum/outstanding. Chhota STP works like a Daily SIP without involving transactions in Investor's Bank Account where realization may delay the allotment of NAV and hence, is more efficient in itself.

(ii) Combo SIP cum STP

Under Combo SIP cum STP investors may transfer on daily basis Rs. 100/- or in multiples of any amount in full rupee terms to an Opted Scheme, per Business Day, as under.

- (a) Out of Normal Investment: An investor against his existing or fresh lump sum investment may opt for this facility through daily STP where a transfer of Rs. 100 or any amount thereafter (in full rupee terms) on every Business Day will be effected by the AMC/its Registrar automatically during the opted period or till the out-scheme/ plan/option is able to transfer funds, whichever is earlier in any of Plan/ Option of the Scheme being an Open-ended Schemes.
- (b) Out of SIP Investment: An investor may choose to avail of this facility against his existing/fresh SIP Account in any of the Open-ended Schemes/ Plans/ Options where transfer of Rs. 100/- or in multiples of any amount (in full rupee terms) through daily STP would be effected on each Business Day of the Scheme. Through this mechanism of regular inflow & outflow, the investor may invest higher amount through SIP and benefit from the Daily Volatility of the Market through daily STP with smaller amounts of Rs. 100/- per day or more for better risk adjusted returns. The investor can also choose multiple STP target Schemes/Plans/Options through this route as the amount of minimum investment per installment is very low.

In order to treat the Chhota STP/Combo SIP cum STP as valid one, the Investor is required to meet the minimum Investment amount of the targeted Options of the Scheme/Plan within 90 days of the 1st Installments of respective Chhota SIP/Combo SIP-cum-STP.

In case of non – fulfillment of Minimum Investment Criteria of the particular Option of the targeted Scheme/Plan under Chhota STP/ Combo SIP-cum-STP facility within 90 days of the 1st Chhota STP/1st Combo SIP-cum-STP due date, the AMC may, at its discretion redeem the allotted units at current NAV and remit the proceeds any time after the completion of specified period of 90 days, if not already redeemed by the investor. In an out-going scheme folio, the Investor can also make investment through SIP or through Additional investment to meet the minimum Investment criteria of the Scheme/Plan concerned in order to avoid automatic redemption by the AMC.

SYSTEMATIC WITHDRAWAL PLAN (SWP) :

In order help Investors to have uninterrupted inflow of funds from his existing investments regularly, the Scheme offers SWP as per following table.

Facility	Options	Fre-quency	Permissible Dates	Minimum Gap to start Instalment.	Minimum Amount	Mini-mum Number of install-ments	Mini-mum Discontinuation Notice period from Investor	Auto Cancellation Condition
SWP	Fixed Amount Withdrawal (FAW)	Month-ly	1st,5th,10th, 15th, 20th & 25th	15 Calendar Days for Offline and 5 calendar days for Online Registration	Rs. 1000/- each instalment. Further in multiples of Re 1/-	Not Applicable	15 Calendar Days for Offline and 5 calendar days for Online cancellation request	In case, 5 consecutive SWP Installments fail
		Quar-terly	1st of any calendar month and subsequently every quarter		Rs. 3000/- each instalment. Further in multiples of Re 1/-			In case, 2 consecutive SWP Installments fail
	Capital Appreciation Withdrawal (CAW)	Month-ly	1st, 5th ,10th, 15th, 20th & 25th		Rs. 1000/- each instalment. Further in multiples of Re 1/-			In case, 5 consecutive SWP Installments fail
		Quar-terly	1st of any calendar month and subsequently every quarter		Entire Capital Appreciation over previous due date with a			In case, 2 consecutive SWP Installments fail

This condition will, however, not be applicable in case of CAW where the condition of minimum SWP instalments could not be met due to the capital appreciation amount being less than Rs. 500/- in case of monthly and quarterly options.

Under SWP, the Investor shall have an option to predetermine the withdrawal of funds from the Scheme. SWP facility is available on monthly and quarterly basis on the specified dates mentioned in the above table i.e. 1st, 5th, 10th, 15th, 20th and 25th of the month under monthly and 1st Business Day of the next month for quarterly SWP. However, the start of 1st installment of SWP is subject to the minimum gap of 15 calendar days prior to the next available chosen SWP due date. The next installment will after 1 and 3 month/s of completion of 1st installment in respect of Monthly & Quarterly SWP due date respectively.

In case, it is not possible for the AMC/Registrar to start the SWP from the opted start date due to the insufficiency of time given by the investor, the AMC/Registrar will automatically process the first SWP on the opted date from the next month after the opted starting month e.g. In case investor applies for SWP on 18th June, 2021 for effecting 1st SWP from 1st July, 2021, AMC / its Registrar may process the same from 1st of August, 2021. In such a case, the ending period will be extended automatically by another month.

The Scheme offers following two Options under the SWP facility out of which the Investors may choose as per his plan :

(a) Fixed Amount Withdrawal (FAW):

Under this Option, the investor will have the facility to automate withdrawal of a fixed amount from the Scheme at Monthly / Quarterly intervals on the opted due date.

(b) Capital Appreciation Withdrawal (CAW):

Under Capital Appreciation Withdrawal facility, the investors will have the option to indicate automatic withdrawal of capital appreciation at varying time intervals over previous period, on monthly or quarterly basis with a minimum of Rs. 500/- each instalment.

Example: Mr. X has invested Rs. 10,000 in the Scheme and instructs the AMC for CAW withdrawal on monthly basis. If his investment turns to be Rs. 10,500 at the end of first month, the appreciated value of Rs. 500/- or more would be automatically withdrawn from the Scheme and paid to him .

Minimum amount for withdrawal under SWP is fixed as under :

- a. Fixed Amount Withdrawal (FAW): Rs.1,000/- per month or Rs.3,000/- per quarter and further in multiples of Re.1 /- thereafter.
- b. Capital Appreciation Withdrawal (CAW) Entire Capital Appreciation over the previous due date to current due date subject to a minimum of Rs. 500/- under both monthly options and quarterly options.

In case, the opted SWP day falls on a non-business day, the next business day shall be deemed to be the transaction day for that month/ quarter.

This facility is not available for investments under locked-in / encumbered/ lien investments. All withdrawals under SWP including FAW & CAW options shall be considered as redemption with no further specific request or documentation requiring to be submitted by the unit holders.

All operational instructions of SWP including FAW options shall be in Rupees and not in Units.

For the respective date of processing the SWP request, an updated Account Statement / CAS showing the amount withdrawn under SWP together with balance units (post accounting the SWP) in their account shall be mailed to the unit holders.

In case, the balance falls below the prescribed minimum balance (based on applicable NAV) due to redemptions or SWP, the AMC reserves the right to discontinue the SWP facility and / or close an investor's account if the investor fails to make fresh investment which is sufficient to bring the value of the account to the prescribed minimum (based on applicable NAV), in case of failure of 5 consequent SWP instalment in respect of monthly and 2 in respect of quarterly SWP.

Perpetual STP/SWP

An investor who does not want to opt for any specific period, may opt for Perpetual STP/SWP i.e. without mentioning any fixed period for his STP/SWP. Perpetual STP/SWP can be cancelled/discontinued only on the written request of the investor or on account of automatic discontinuation/cancellation in terms of provisions of the facility e.g. failure of 5 continuous installments for a particular monthly SIP date as set out above or insufficient balance in out-scheme etc.

Discontinuation/Termination/Cancellation of STP/SWP:

In order to start the STP/ SWP, the investor must have a minimum investment of Rs. 5,000/- or above in the particular Option of the Scheme i.e. as per the minimum investment subscription amount (whichever is higher) applicable for the Scheme/Plan/Option on the 1st opted STP/SWP date. However, the investor is not required to maintain the same balance after processing the 1st STP/SWP installment. The last installment may be equivalent to or less than the opted installment amount.

No single installment under STP/SWP can exceed the outstanding invested amount divided by the number of installment chosen subject to the fulfillment of minimum STP/SWP criteria for respective frequency. In case of multiple STP/SWP dates, the total number of installments will be taken into account while fixing up the maximum installment amount.

Each application must comply all the terms and conditions independently for each Option of the Scheme/Plan/Option, failing which the respective STP/SWP will be treated as invalid and will be subject to the rejection/cancellation/refund/auto redemption / revertal & reprocessing etc as per the discretion of the AMC. No two or more STP/SWP cases will be clubbed to determine the fulfillment of Minimum Investment Criteria.

Cancellation of STP/SWP on request by Investor

For discontinuation of STP/ SWP, the unitholder is required to intimate the AMC/ Registrar in writing through a signed request by all the joint-holders and such request should reach the AMC/RTA , at least 15 Calendar Days (2 business days in case of online cancellation) prior to the

next installment for the respective due date. On such request, STP/ SWP will be terminated and the transfer/ withdrawal instructions given by the investor will be treated as cancelled.

Further, in case of non-fulfilment of any other terms and conditions, the STP/SWP will be treated as cancelled/discontinued/terminated as per the discretion of the AMC.

Switching Options

Unitholders under the Scheme have the option to switch part or all of their unit holdings in the Scheme to another Scheme established by the Fund, or within the Scheme from one Plan to another, which is available for investment at that time. This option will be useful to Unitholders who wish to alter the allocation of their investment among the Scheme/Plan(s)/Options of the Fund in order to meet their changed investment needs.

The switch will be effected by way of a redemption of Units from the Plan/Option and a reinvestment of the net redemption proceeds in the opted Plan/Option of the other Scheme and accordingly, to be effective, the switch must comply with the redemption rules of the switching-out Scheme and the issue rules of the other switching-in scheme (for e.g. as to the minimum number of Units that may be redeemed or issued, exitload, stamp duty, taxes etc). The price at which the Units will be switched out of the Plan will be based on the Repurchase Price, and the proceeds will be invested in the opted Plan/ Option of the other Scheme at the prevailing sale price for units in that scheme/plan/option. The switch - out from one scheme to another scheme (i.e. requiring change in portfolio) will be effective only after the switch - out scheme has received the funds in the Scheme. Accordingly, the applicability of NAV will be dependant on the SEBI guidelines.

Subject to necessary approvals (if any) from the Regulatory authorities and any other approval as applicable, tax deduction at source, if any, will be effected at the appropriate rate in case of a switching by NRIs/FPIs and the balance amount would be utilized to exchange units to the other Scheme.

Switch of Units in Demat Mode – Please refer to the provisions set out under the head “Ongoing Offer Details”

For the purpose of this section, "long term specified asset" means a unit or units, issued before the 1st day of April, 2019, of such fund as may be notified by the Central Government in this behalf.

Under Section 54F(1) of the Act, subject to the conditions specified therein, in the case of an individual or a HUF, capital gains arising on transfer of a long term capital asset (not being a residential house) are not chargeable to tax if the entire net consideration received on such transfer is invested within the prescribed period in one residential house in India. To avail this deduction, the investor should not own more than one residential house in addition to the proposed new residential house for which deduction is sought to be claimed. If part of such net consideration is invested within the prescribed period in one residential house, then such gains would not be chargeable to tax on a proportionate basis. For this purpose, net consideration means full value of the consideration received or accruing as a result of the transfer of the capital asset as reduced by any expenditure incurred wholly and exclusively in connection with such transfer.

The Finance Act, 2023 provides that for working out the exemption under these sections, the investment in residential property shall be capped at INR 10 crores.

From 1,200,001 to 1,500,000	20%

Further, the Finance Act, 2023 to enhanced the rebate limit to INR 700,000 i.e. taxpayer opting for new regime shall not be required to pay tax if the total income is less than or equal to INR 700,000. Further, the Finance Act, 2023 to reduce the highest rate of surcharge from 37% to 25% under the new tax regime (highest effective tax rate under new tax regime will be 39%).

Domestic Companies

In case of domestic companies, short term capital gain will be chargeable to tax at the applicable corporate tax rate (generally, 30%; tax rate of 25% would be applicable if total turnover or gross receipts during the financial year 2021-22 does not exceed Rs 400 crores). In case of domestic companies, if income exceeds Rs. 1 crore but does not exceed Rs 10 crores, then the tax payable would be increased by a surcharge @ 7% (except such domestic company whose income is chargeable to tax under section 115BAA or 115BAB of the Income-Tax Act and if income exceeds Rs 10 crore then surcharge @ 12% (except such domestic company whose income is chargeable to tax under section 115BAA or 115BAB of the Income-Tax Act). For companies covered under section 115BAA or 115BAB surcharge @ 10% is applicable. In all cases, the tax payable (as increased by surcharge in case of companies referred to above) would be further increased by Health & Education Cess (4%).

C. LONG TERM CAPITAL GAINS TAX ON TRANSFER OF UNITS OF EQUITY ORIENTED FUNDS

Under Finance Act 2017, as per Section 10(38) of the Act, long term capital gains arising on sale of units of equity oriented funds are exempt from income tax in the hands of Unit holders, provided Securities Transaction Tax (STT) is charged on such sale by the Mutual Fund.

As per Finance Act, 2018, the exemption available under section 10(38) has been withdrawn prospectively by inserting section 112A in the Act. Accordingly, long term capital gains arising from transfer of such units exceeding INR 1,00,000 would be taxable at 10% under section 112A with effect from 1st April 2018.

No indexation benefit would be available in respect of such long term capital gains. However, gains made upto 31st January 2018 will be grandfathered. To give effect to the grandfathered provisions, the cost of acquisition will be deemed to be higher of:

- a. Actual cost of acquisition; and
- b. Lower of
 - Fair market value (i.e. the highest price quoted on a recognized stock exchange on or near 31st January 2018 in case of listed asset or net asset value in case of unlisted units); and

Note:

- A. The levy of tax on distributed income payable by Mutual Funds has been abolished w.e.f. April 1, 2020 and instead tax on income from mutual fund units in the hands of the unit holders at their applicable rates has been adopted.
- 1 Equity Oriented Funds will also attract Securities Transaction Tax at applicable rates.
- 2 As per the provisions of section 196A which is specifically applicable in case of non-resident unitholders, a withholding tax rate of 20% (plus applicable surcharge and cess) on any income in respect of units of a Mutual Fund credited/ paid to non-resident unitholders shall apply, as section 196A does not make reference to "rates in force" but provides the withholding tax rate of 20% (plus applicable surcharge and cess).
- As per the provisions of section 196D of the Act which is specifically applicable in case of FPI/FII, the withholding tax rate of 20% (plus applicable surcharge and cess) on any income in respect of securities referred to in section 115AD (1)(a) credited / paid to FII shall apply. The Finance Act, 2021 inserted a proviso to section 196D(1) of the Act to grant relevant tax treaty benefits with effect from 1 April 2021 at the time of withholding tax on income with respect to securities of FPIs, subject to furnishing of tax residency certificate and such other documents as may be required. As per section 196D (2) of the Act, no TDS shall be made in respect of income by way of capital gain arising from the transfer of securities referred to in section 115AD of the Act.
- 3 Health and education Cess shall be applicable at 4% on aggregate of base tax and surcharge.
- 4 The Finance Act, 2023 provide that in case of domestic company, the rate of income-tax shall be 25% if its total turnover or gross receipts in the financial year 2021-22 does not exceed Rs. 400 crores.
- 5 The corporate tax rates for domestic companies (not claiming specified incentives and deductions) at the rate of 22% under section 115BAA and domestic manufacturing companies (not claiming specified incentives and deductions) set-up and registered on or after 1 October 2019 at the rate of 15% under section 115BAB. The tax computed in case of domestic companies whose income is chargeable to tax under section 115BAA or section 115BAB shall be increased by a surcharge at the rate of 1 0%.
- 6 Short term/ long term capital gain tax will be deducted at the time of redemption of units in case of NRI investors only. However, as per section 196A of the Act the withholding tax of 20% (plus applicable surcharge and cess) is applicable on any income in respect of units of mutual fund in case of non-residents. Hence, based on language provided in said section, it seems that apart from any income distributed to NRI, withholding tax at 20% may be applicable on capital gains notwithstanding that such capital gains are taxable at a rate lower than 20%.
- 7 Section 112A provides that long term capital gains arising from transfer of a long term capital asset being a unit of an equity oriented fund shall be taxed at 10% (without indexation and foreign currency fluctuation benefit) of such capital gains exceeding one lakh rupees. The concessional rate of 10% shall be available only if STT has been paid on transfer in case of units of equity-oriented mutual funds.

D. CAPITAL GAIN ON TRANSFER OF MARKET LINKED DEBENTURES (MLDs):

In order to rationalize the provisions, the Finance Act, 2023 inserted a new section 50AA in order to determine the taxability of MLDs with effect from AY 2024-25. The gain on sale of MLDs are proposed to be taxed as short-term capital gains and accordingly chargeable to tax at applicable slab rates to the taxpayer. As of now, there are no specific provisions for withholding tax on capital gains on sale of MLDs for resident individuals. However, taxes may be withheld of non-residents at the highest applicable rate of tax.

E. CAPITAL LOSSES:

Losses under the head "Capital Gains" cannot be set off against income under any other head. Further within the head "Capital Gains", long term capital losses cannot be adjusted against short term capital gains. However, short term capital losses can be adjusted against long term capital gains. Long term capital loss arising on transfer of units of an equity oriented fund on which STT is paid, cannot be set-off against any other capital gains. Consequently, such loss shall lapse in the year in which it is incurred. However, as per the Finance Act, 2018, since long-term capital gains arising on sale of units of equity oriented fund would be taxable with effect from 1st April 2018, losses incurred post 1st April 2018 would be allowed to be set-off against taxable capital gains.

Unabsorbed long-term capital loss and short-term capital loss can be carried forward and set off against the income under the head Capital Gains in subsequent eight assessment years, except that loss arising from transfer of long term capital assets cannot be set-off against gain arising from transfer of short term capital assets.

According to Section 94(7) of the Income Tax Act, if any person buys or acquires units within a period of three months prior to the record date fixed for declaration of dividend or distribution of income and sells or transfers the same within a period of nine months from such record date, then losses arising from such sale to the extent of income received or receivable on such units, which are exempt under the Income Tax Act, will be ignored for the purpose of computing his income chargeable to tax.

Further, Section 94(8) provides that, where additional units have been issued to any person without any payment, on the basis of existing units held by such person then the loss on sale of original units shall be ignored for the purpose of computing income chargeable to tax, if the original units were acquired within three months prior to the record date fixed for receipt of additional units and sold within nine months from such record date. However, the loss so ignored shall be considered as cost of acquisition of such additional units held on the date of sale by such person.

F. TAX DEDUCTION AT SOURCE

Tax Deducted at Source (TDS) is a system introduced by Income Tax Department, where the person responsible for making specified payments is liable to deduct a certain percentage of tax before making payment in full to the receiver of the payment.
