Monthly Market Update by JM Financial Mutual Fund

Details as on December 31, 2013

Market Update - Equity

ECONOMY

IIP data for October, 13 disappointed as it declined by 1.8%, although it was on a high base of 8.4% in October last year. Sector wise, mining fell by 3.5%, manufacturing too was down 2% while electricity growth moderated significantly. On a use-based classification, Capital goods output improved to 2.3% but consumer goods fell due to a sharp fall in the durables.

WPI numbers in November '13 continued with its rising trend and stood at 7.5% against 7% in the last month. Core WPI, however, was subdued at 2.7%. CPI also rose to 11.2% from 10.2% last month primarily due to the vegetable prices. Core CPI stood at the same level of 8% as last month.

Despite both inflation numbers released during the month, coming above RBI's estimates, the RBI surprised markets as it kept rates unchanged in the month of December. The Central Bank, however, clarified that it would wait for more data to reduce uncertainty.

STOCK MARKET

During the month of December, Nifty went up by 2.1% and Sensex by 1.8% outperforming the Hang Seng which went down by 2.4% during the same period. FII's ended the last month of the calendar year as net buyers, with net inflows to the tune of \$ 2.5bn in December, thus taking the amount for CY'13 to a total of around \$20bn net inflows. Domestic institutions on the other hand continued to be net sellers, with \$1.2bn net outflows over December. Insurance companies accounted for \$1.1bn of outflows while MFs recorded net outflows of \$94mn. During the full calendar year of 2013, domestic institutions were net sellers to the tune of \$12.9bn.

Market Update - Derivatives

The December expiry level of the Nifty index was around 3% higher than that of the November level. The market-wide rollover on the last day stood at ~77% which was a little higher compared to average rollovers of ~75% (last three series). The January series started with market wide future open interest of ~INR 477bn as against ~INR 449bn seen at the start of the December expiry. Nifty rollovers stood at ~68% compared to average rollovers of ~70% (last three series). Stock futures rolls were at 81%, 2 percentage points higher than its three-month average of 79%. The sectors which witnessed higher rolls were Textile, IT, Infra, Cement and Banking while Power, Realty, Oil & gas and Metal sectors saw lower rollover compared to last month. Volatility in the markets may help churn the arbitrage portfolio and generate good returns.
