Monthly Market Update by JM Financial Mutual Fund

Details as on April 30, 2014

Market Update - Equity

ECONOMY

Industrial production came in at a 9 month low of -1.9% in the month of February. This was despite the core infra sector growing 4.5%Y-o-Y and the excise duty cut that was effective mid-Feb. Sector-wise, electricity and mining were positive while manufacturing continued to contract. On use based classification, capital goods and consumer goods both contracted. April manufacturing PMI came at 51.3.

March CPI & WPI climbed to 8.3% and 5.7% (v/s. 8% and 4.7% in February respectively). The uptick in CPI was driven by higher food inflation. Core CPI remained unchanged at 7.8%. Higher WPI was driven by a pick-up in manufacturing and higher primary articles as well as the base effect. Core WPI went up marginally to 3.5%. Cumulatively, FY'14 CPI eased to 9.5% from 10.2% in FY'13 and WPI to 5.9% v/s. 7.5% in FY'13.

Indian Met Department released their forecast for the monsoons in 2014 in which the following is expected-95% of Long Period Average rainfall, 56% probability of less than normal rainfall (of which Deficient: 23%; Below normal: 33%) and 60% probability of an El Niño event. Deficient rainfall may be one of the most important factors to watch out for and might be an important determinant for the direction of monetary policy of the RBI.

STOCK MARKET

Indian equities had a month of consolidation in April with the benchmark indices closing flat despite hitting all-time highs. FII flows saw some slowdown vis-à-vis March - inflows totaled \$1.2bn during the month taking the YTD number to \$5.3bn. DIIs continued to be on the other side of the trade, emerging net sellers to the tune of \$1.1bn in April - taking their YTD tally to \$3.5bn. Among the domestics, net selling by the mutual funds was to the tune of \$480mn while insurance companies sold \$660mn.

Market Update - Derivatives

The April expiry level of the Nifty index was around 3% higher than that of the March level as the pre election rally continued. The market-wide rollover on the last day stood at ~72% which was lower compared to average rollovers of ~75% (last three series). The May series started with market wide future open interest of ~INR 506bn as against ~INR 478bn seen at the start of the April expiry. The Nifty rollovers stood at ~59% compared to average rollovers of ~65% (last three series). Nifty started the May series with an open interest of INR 102bn as against ~INR 113bn at the start of April series. Ahead of the election outcome, Nifty futures positions seem to have lightened. The sectors which witnessed higher rolls were infra, banks and metals while power, auto and IT sectors saw lower rollover. Volatility in the markets may help churn the arbitrage portfolio and generate good returns.
