Details as on October 31, 2013

Market Update - Equity

ECONOMY

IIP for Aug disappointed as it came in at 0.6%. Manufacturing sector plunged back to the red while mining continued contracting for the 11th consecutive month. On a use based classification, capital goods shrunk while consumers too continued with their downward trend. Oct PMI remained unchanged from previous month print of 49.6.

WPI inflation continued to harden, coming in at 6.5% in September as against 6.1% in August. With vegetable prices still on the rise, food inflation remained high at 18%. Sep CPI rose to 9.8% from 9.5% in August owing to high food prices.

RBI raised the repo rate by 25bps to 7.75% as the credit policy focused on controlling inflation, with a focus on growth. The RBI also lowered the MSF rate by 25bps, which in addition to the 50bps cut taken earlier in the month, brought it down to 8.75%. The Central Bank also sought to ease short term liquidity through term repos from 0.25% to 0.5% of NDTL.

INR stabilized within 61-62/\$ range this month resulting in RBI gradually unwinding its measures to support the INR. The month saw RBI receiving ~\$10bn under the special concessional window for swapping Foreign Currency Non-Resident (FCNR 'B') and overseas foreign currency borrowing.

STOCK MARKET

Indian equities had a subdued start in the month of October due to related concern of the impending US Govt shutdown. However, market gained momentum over the month, with the benchmark Nifty rising 9.8% in October as sentiments were largely buoyed by the 2Q earnings season, that was kicked off by Infosys on a positive note. Sector wise, Financials and Industrials were the outperformers in October while FMCG was the only sector in the red. Flow-wise, FIIs remained net buyers at \$2.9bn and DIIs were net sellers to the tune of \$2bn. Continuing with the reversed trend seen in September, FIIs continued to be net buyers in October as well, with net inflows to the tune of \$2.9bn, that took the YTD figure to ~\$16.3bn net inflows. DIIs remained on the other side, net sellers to the tune of ~\$2bn - with Insurance companies accounting for over half the outflows at \$1.4bn and MFs contributing \$580mn. YTD, DIIs were net sellers at ~\$10.3bn.

Market Update - Derivatives

The October expiry level of the Nifty index was around 7% higher than that of the September level. The market-wide rollover on the last day stood at ~76% which was higher compared to average rollovers of ~71% (last three series). The November series started with market wide future open interest of ~INR 458bn as against ~INR 370bn seen at the start of the October expiry. Nifty rollovers stood at ~73% compared to average rollovers of ~64% (last three series). Stock futures rolls were at 78%; 3 percentage points higher than its three-month average of 75%. Rolls in Financial (82%) & Cement (80%) stocks were higher than the three-month average this expiry. Volatility in the markets is expected to help churn the arbitrage portfolio and generate good returns.
