REPORT OF THE BOARD OF TRUSTEES

Dear Investor,

The Board of Trustees of JM Financial Mutual Fund is pleased to present the Annual Report of JM Financial Mutual Fund for the year ended March 31, 2012.

ECONOMIC OUTLOOK

While the long term India growth story is intact, global recovery appeared shaky with new financial stress emerging from the euro region. Indian economy is estimated to have grown at 6.9% (as per the estimates of Central Statistics Office) versus the higher earlier estimates of 7.5% by the markets, in general.

The major worries for Indian economy continued to be the higher fiscal deficit driven by higher crude oil prices and depreciating Rupee. Industrial growth, measured in terms of Index of Industrial Production (IIP), witnessed fluctuating trends. Corporate earnings have also been downgraded and Sensex is expected to clock EPS of 1250 in FY13, which discounts the market at 13.2x.

Headline Wholesale Price Index (WPI) inflation remained persistently high and relatively sticky at around 9% during 2011. Though inflation remained high throughout the year, it has shown signs of moderation lately.

Liquidity conditions for a large part of FY 2011- 12 remained tight with the liquidity deficit at more than 1% of Net Demand and Time Liabilities (NDTL) of the banking system. There was a rapid tightening of liquidity since November 2011. This was on account of pressure created by foreign exchange outflows and quarterly advance tax collections in December. The RBI responded with a number of measures aimed at addressing the tightness in the foreign exchange market, including

the conduct of Open Market Operations (OMOs) to address rupee liquidity concerns. During the year FY 2011-12, the growth rates of reserve money (M0) and narrow money (M1) have been lower than in the preceding year while broad money (M3) growth has been higher.

Both the Sensex and Nifty exhibited bearish sentiment and declined 10.50% and 9.23% respectively during the financial year ended March 31, 2012. Broader indices like BSE100 and BSE500 did marginally better than the Sensex & Nifty.

Comparison of indices as on March 31, 2011 and March 30, 2012 is as follows:

Index Name	From date (March 31, 2011)	To date (March 30, 2012)	Comp. Annualized (%)
BSE Sensex	19,445.22	17,404.20	(10.50%)
S&P Nifty	5,833.75	5,295.55	(9.23%)
BSE100	5855.53	5315.15	(9.23%)
BSE500	7,437.26	6,759.63	(9.11%)
BSE200	2378.69	2157.89	(9.28%)
CNX Midcap	8,040.15	7,711.40	(4.09%)

Source : Bloomberg

Markets are expected to be volatile in the near future. This volatility will help to churn the arbitrage portfolio as few stock futures tend to trade at a discount to their cash market prices. The same can be deployed into fresh arbitrage in other stocks, which would help in enhancing the returns of Arbitrage schemes.

EQUITY SCHEMES OF JM FINANCIAL MUTUAL FUND:**JM Equity Fund**

JM Equity Fund is an open-ended growth scheme with the main objective to provide optimum capital growth and appreciation. The Scheme continues to hold a diversified portfolio with a prudent mix of large cap and mid cap stocks.

The Scheme has marginally underperformed the benchmark in 2011-12 and since inception. The primary reason for underperformance has been low exposure to the consumer and pharmaceutical sectors.

The Scheme was restructured wherein the strategy was to move to larger market cap Nifty stocks and avoid mid caps, in a rising interest rate scenario. Consequently the exposure to large cap stocks constitutes more than 90% of the portfolio at present. A combination of diversification and co-relation to Nifty is expected to give the portfolio an essential fundamental strength and stability going forward.

JM Balanced Fund

JM Balanced Fund is an open-ended balanced Scheme with the investment objective to provide steady current income as well as long term growth of capital.

The Scheme has marginally underperformed its benchmark during FY 2011-12. The primary reason for underperformance has been low exposure to the consumer and pharmaceutical sectors.

JM Balanced Fund has been adopting a conservative investment approach though the broad philosophy for the equity portion continues to be to pick high growth stocks using bottom-up investment approach. The Scheme intends to continue with this approach.

JM Multi Strategy Fund

JM Multi Strategy Fund invests primarily in equities and equity related securities using a combination of strategies. During favorable market conditions, the Scheme will act like an aggressive growth fund with a concentrated portfolio and a targeted portfolio beta of greater than 1, whereas in a bearish market scenario the Scheme will have a low volatility conservative portfolio of larger number of stocks with a targeted lower beta.

The Scheme has underperformed the benchmark in 2011-12 and since inception. JM Emerging Leaders Fund which was largely a mid-cap Scheme got merged into this Scheme, thus requiring restructuring of the portfolio to align it with the mandate of JM Multi Strategy Scheme. The primary reason for underperformance has been low exposure to the consumer and pharmaceutical sectors.

The Scheme has been re-structured and currently the scheme has more than 78% of large cap stocks and 76% in Nifty stocks. A combination of diversification and co-relation to Nifty is expected to give the portfolio an essential fundamental strength and stability going forward.

JM Basic Fund

The primary objective of the scheme will be to provide capital appreciation to its unit holders through judicious deployment of the corpus of the Scheme in sectors categorized under "basic industry" in the normal parlance and in context of the Indian economy, including but not limited to, energy, petrochemicals, oil & gas, power generation & distribution and electrical equipment suppliers, metals and building material. The Scheme would continue to remain open-ended with a sector focus.

The Scheme has underperformed its benchmark in FY 2011-12 but has outperformed the benchmark since inception. The primary reason for underperformance has been the low exposure to the consumer and pharmaceutical sectors.

The proportion of large caps has been increased substantially and Nifty stocks constituted more than 75% of the portfolio. The combination of diversification and co-relation to Nifty is expected to give the portfolio an essential fundamental strength and stability going forward.

JM Core 11 Fund

JM Core 11 Fund was a 3 year close ended equity oriented scheme. SEBI vide its approval OW/4010/2011 dated February 2, 2011 permitted the Scheme to become open-ended, in the interest of the investors. The investment objective of the Scheme is to provide long-term growth by investing predominantly in a concentrated portfolio of equity/ equity related instruments. Because of a higher concentration, the scheme falls in the high risk – high return category.

The Scheme has underperformed its benchmark in FY 2011-12 and since inception, owing to poor performance in 2008. The primary reason for underperformance has been the low exposure to the consumer and pharmaceutical sectors.

The Scheme has invested in 11 large cap stocks with high growth potential. The Scheme portfolio has more than 80% in large caps. It is believed that a combination of high growth stocks and high liquidity will give the portfolio an essential fundamental strength, stability and flexibility going forward.

JM Tax Gain Fund

The investment objective is to generate long-term capital growth from a diversified and actively managed portfolio of equity and equity related securities and to enable investors a deduction from total income, as permitted under the Income Tax Act, 1961 from time to time. This Scheme has a diversified portfolio and invests in companies across all market capitalizations. The Scheme seeks to provide capital appreciation by investing in growth stocks which are available at reasonable valuations across sectors.

The Scheme had underperformed the benchmark in FY 2011-12 and since inception. The primary reason for underperformance has been low exposure to the consumer and pharmaceutical sectors.

Currently, large caps constitute 70% of the portfolio. A combination of diversification and co-relation to Nifty is expected to give the portfolio an essential fundamental strength and stability going forward.

JM Arbitrage Advantage Fund

The primary investment objective of the Scheme is to generate income through arbitrage opportunities emerging out of mis-pricing between the cash market and the derivatives market and through deployment of surplus cash in fixed income instruments.

The Scheme has underperformed the benchmark (Crisil Liquid Fund Index) in FY 2011-12 due to high interest rates prevalent during the year. However the Scheme continues to outperform the benchmark since inception.

Markets are expected to be volatile in the near future. This volatility will help to churn the Arbitrage portfolio as few stock futures tend to trade at a discount to their cash market prices. The same can be deployed into fresh arbitrage in other stocks, whereby the returns of the Scheme could be enhanced.
